

Plant Hormones

How do plant hormones affect plant growth and development?

Why?

Seeds do not usually sprout in the winter—how do they know when to germinate? Grocery stores need to have ripe, unbruised produce to sell to the public, but often this produce is packed weeks ahead of time and shipped hundreds of miles to get to the store. How does it ripen after harvest? There are several different plant hormones that help to orchestrate plant growth, development, ripening, and responses to various environmental stimuli.

Model 1 – Phototropism

Before exposure to light.				
After exposure to light.				

1. Consider the experiment illustrated in Model 1.
 - a. What is the stimulus in this experiment?
 - b. What is the plant's response to the stimulus in the control?
