Libby,2017-01-26 Where are we ever going to use this Every high school math student has asked this question Often teachers

themselves aren't sure how to respond. One answer is that higher mathematics learned in high school will be essential to learning yet more at the college level. A more satisfactory answer calls for an awareness of how math is applied in many specific areas. Written primarily for teachers, this book presents hundreds of practical applications for mathematics from baseball statistics to the theory of relativity that can be understood by anyone with a knowledge of high school algebra, geometry, and trigonometry. *PC Mag*, 2005-10-04. Baird, a British television pioneer, experimented with video recording on gramophone discs in the late 1920s. McLean, a consultant, has restored the surviving Phonovision discs and, using computer techniques reminiscent of an archaeological dig, has revealed the images on the discs and uncovered details of how the recordings were made. McLean also restored amateur recordings of the BBC's 30-line Television Services, 1932-1935, providing a glimpse at what viewers were then watching. This book helps explain this period in television history. Illustrated with historic photographs, it sheds light on the achievements of Baird, the development of video recording, and the definition and invention of television itself. c.
