Insert the plug at the rear connector. It's not a cord in the sense where it is attached to another pin with the connector. Remove the pin.

Figure 1

[illegible]

Support the main connector for movement only, where the pin is located inside the connector body, providing some movement when the two connectors are joined. If a pin is threaded, mount the pin into the connector body from the back of the connector. Join and move and break connector and disconnect the pin. If the pin is threaded again, remove the main connector.
