1. One characteristic shared by sucrose, lactose, and maltose is that _____.
 - a. they are all polysaccharides
 - b. they are all monosaccharides
 - c. they are all disaccharides
 - d. they all contain fructose
 - e. they are all indigestible by humans
2. When a protein is denatured, why does it lose its functionality?
 - a. Denaturation breaks bonds that hold the protein in its 3-dimensional shape. Without the proper shape, the protein cannot function.
 - b. Denaturation breaks the peptide bonds.
 - c. Denaturation destroys the primary structure of the protein, and the protein breaks down to monomers.
 - d. Different amino acids are substituted into the sequence, so the protein's properties change.
 - e. The protein's pH changes, causing it to lose its functionality.
3. Nutritionally, saturated triglycerides are considered to be less healthy than unsaturated triglycerides. What is the difference between them?
 - a. Saturated triglycerides are fats; unsaturated triglycerides are carbohydrates.
 - b. Saturated triglycerides have more hydrogen atoms than unsaturated triglycerides.
 - c. Saturated triglycerides have more double bonds than unsaturated triglycerides.
 - d. Saturated triglycerides are liquid at room temperature.
 - e. all of the above.
4. Which of the following is a polymer?
 - a. testosterone, a steroid hormone

Mechanical and Thermophysical Properties of Polymer Liquid Crystals Witold Brostow,2013-11-27 may never overcome the effects of hysteresis and stress see Chapters 6 and 12 The first sentence of the reference work Handbook of Liquid Crystals reads The terms liquid crystals crystalline liquid mesophase and mesomorphous state are used synonymously to describe a state of aggregation that exhibits a molecular order in a size range similar to that of a crystal but acts more or less as a viscous liquid 2 In other words molecules within a liquid crystalline phase possess some orientational order and lack positional order furthermore the shape of a liquid crystalline sample is determined by the vessel in which it is contained rather than by the orientational order of its aggregated molecules The authors recognized the limitations and imprecision of this definition but like others preceding them could not devise a simple and generally applicable one that is better Regardless the terms liquid crystal and mesophase should not be used interchangeably As mentioned above all liquid crystals are mesophases but all mesophases are not liquid crystals Recent studies employing elaborate and sophisticated analytical techniques have permitted finer distinctions between classical crystals and mesophases At the same time they have made definitions like that from the Handbook of Liquid Crystals somewhat obsolete for reasons other than terminology One part of the problem arises from the use of a combination of bulk properties like flow and microscopic properties like molecular ordering within the same definition **Oswal - Gurukul Biology Most Likely Question Bank : CBSE Class 12 for 2023**

Exam Oswal - Gurukul,2022-06-10 *The Construction of Analogy-Based Research Programs* Rebecca Mertens,2019-03-20 When the German chemist Emil Fischer presented his lock and key hypothesis in 1899 his analogy to describe the molecular relationship between enzymes and substrates quickly gained vast influence and provided future generations of scientists with

a tool to investigate the relation between chemical structure and biological specificity Rebecca Mertens explains the appeal of the lock and key analogy by its role in model building and in the construction of long term cross generational research programs She argues that a crucial feature of these research programs namely ascertaining the continuity of core ideas and concepts is provided by a certain way of analogy based modelling

Khanna, 2013-12-30 The present book has been designed to serve the students of Plant Breeding Genetics Biotechnology Biochemistry and Forestry In most of the books the objective type questions judge the students on the basis of their ability to memorize because of the way they are formulated It is important to be able to remember the year of historical events the scientists involved and who named what to make one remember the

landmark contributions of the people on a particular subject Along with these kinds of questions majority of the questions in this book have been designed to assess the candidate s understanding of the subject It is perhaps for the first time where questions have four to six choice statements which are to be understood to find the right answer One has to think and remember what he has learnt to be able to answer these questions There are some books on objective type questions on the subject of Plant Breeding and a very few on Genetics but there is hardly any book which deals with Tissue Culture Biotechnology Biochemistry or Forestry All these subjects are related as many postgraduate students of Genetics and Plant Breeding take Biotechnology as a minor subject whereas those of Biotechnology take Biochemistry or Genetics and Plant Breeding as a minor subject Also undergraduates in agricultural universities study courses on all these subjects including Forestry
