Environmental Policy Analyses Peter Knoepfel, 2007-10-05 Having had the opportunity of receiving considerable public money mainly from the Swiss National Science Foundation for numerous environmental policy studies in Switzerland and abroad during the last 25 years I have decided to put the results published mainly in German and French but also in English in many scientific journals monographs and book sections in a single book on behalf of my students younger scholars interested in policy analysis dating from the period of the first environmental policies and my friends teaching this subject in Switzerland and abroad The criteria used to select the fifteen contributions were their impact on the scientific debate at the time of their publication their validity for present conceptualizations of policy analysis in the field of the environment and their contribution to the development of policy analysis as a whole Moreover the selected contributions mainly focus on empirical applications in the field of environmental policies or the interface between environmental and non environmental policies Some have led to concrete policy recommendations of which most have been partly implemented since at least within my own country This research also sometimes addressed regional political administrative arrangements leading to administrative reforms and new strategic directions of implementing agencies Rediscovering Public Law and Public Administration in Comparative Policy Analysis Stéphane Nahrath, Frédéric Varone, 2009-01-01 Publié à l'occasion du 60^e anniversaire du Prof Peter Knoepfel Professeur à l'Institut de hautes études en administration publique IDHEAP

The book demonstrates the interplay of the different resources in a conceptually coherent framework and presents numerous illustrations of ways of mobilising the resources and managing them in a sustainable way, resource exchanges, and the role of institutions governing the interrelationships between actors and resources. The book will be valuable to postgraduate students as well as those working in policy programming and implementation across both public and private sectors and in non-governmental organisations. *Role of Dams and Reservoirs in a Successful Energy Transition* Robert Boes, Patrice Droz, Raphaël Leroy, 2023-08-31 Today new and unexpected challenges arise for Europe's large array of existing dams, and fresh perspectives on the development of new projects for supporting Europe's energy transition have emerged. In this context, the 12th ICOLD European Club Symposium has been held in September 2023 in Interlaken, Switzerland. The overarching Symposium theme was on the Role of dams and reservoirs in a successful energy transition. The articles collected in this report book, consisting of a 250-page abstract book and a 1010-page full paper USB, cover the various themes developed during the symposium: Dams and reservoirs for hydropower; Dams and reservoirs for climate change adaptation; Impact mitigation of dams and reservoirs; How to deal with ageing dams. In conjunction with the Symposium, the 75th anniversary of the Swiss Committee on Dams offered an excellent opportunity to not only draw from the retrospective of Switzerland's extensive history of dam development but to also reveal perspectives on the new role of dams for a reliable and affordable energy transition. These aspects are illustrated by several articles covering the various activities, challenges, and concerns of the dam community. *The Public Policy Process* Michael Hill, Frédéric Varone, 2016-11-03 The *Public Policy Process* is essential reading for anyone trying to understand the process by which public policy is made. Explaining clearly the importance of the relationship between theoretical and practical aspects of policy making, the book gives a thorough overview.

of the people and organisations involved in the process Fully revised and updated for a 7th edition The Public Policy Process provides Clear exploration using many illustrations of how policy is made and implemented A new chapter on comparative theory and methods New material on studying advocacy coalitions policy changes governance and evaluation More European and international examples This edition appears at a time when its concern to emphasise the complex implications of modern governance and the way in which the ultimate outcome of a new policy initiative will depend on policy formulation and implementation processes is particularly relevant to the UK government's efforts to leave the European Union

comme une autre. En proposant un bilan critique de l'autonomie des agents en contact avec le public, cet ouvrage reprend toutes ces questions et bien d'autres en s'attachant à les situer dans le contexte contemporain de l'action publique, marqué notamment par l'émergence de nouvelles formes de contrôle et de mobilisation des professionnels. *L'eau en partage* David Aubin, 2007. Au fil de l'eau, les usagers sont nombreux et entrent en concurrence pour l'appropriation et l'usage de la ressource. Les comportements des riverains, les gardes des gestionnaires de barrages en sont un exemple. Car le partage de l'eau ne va pas de soi en dépit des nombreuses règles qui le régissent et il donne souvent lieu des rivalités d'usages, c'est-à-dire des affrontements pour son appropriation. Dans cet ouvrage, l'auteur montre comment les usagers parviennent à résoudre ces rivalités et conclure des arrangements locaux au moyen d'une activation des politiques publiques et des droits de propriété existants. Il s'appuie sur l'idée selon laquelle la forme prise par l'arrangement local dépend tout d'abord de la disposition de chaque usager. Celle-ci est décrite sous la forme d'hypothèses et est soumise à une comparaison de cas situés dans les bassins versants de la Vesdre en Belgique et du Val de Bagnes en Suisse. La démarche consiste à apprécier le poids relatif des droits de propriété sur l'eau, notamment la propriété foncière, par rapport aux différentes injonctions et interventions publiques visant à influencer le comportement des usagers et redistribuer l'accès à la ressource. Il apparaît alors que les politiques publiques sont très souvent sollicitées dans les rivalités, y compris par les propriétaires, et qu'elles produisent des effets contrastés sur la répartition des usages de l'eau.
