Assessing the Impacts of Changes in the Information Technology R&D Ecosystem National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Assessing the Impacts of Changes in the Information Technology Research and Development Ecosystem, 2009-03-16 The U S information technology IT research and development R D ecosystem was the envy of the world in 1995 However this position of leadership is not a birthright and it is now under pressure In recent years the rapid globalization of markets labor pools and capital flows have encouraged many strong national competitors During the same period national policies have not sufficiently buttressed the ecosystem or have

generated side effects that have reduced its effectiveness As a result the U S position in IT leadership today has materially eroded compared with that of prior decades and the nation risks ceding IT leadership to other nations within a generation Assessing the Impacts of Changes in the Information Technology R D Ecosystem calls for a recommitment to providing the resources needed to fuel U S IT innovation to removing important roadblocks that reduce the ecosystem s effectiveness in generating innovation and the fruits of innovation and to becoming a lead innovator and user of IT The book examines these issues and makes recommendations to strengthen the U S IT R D ecosystem **The Zoological Record** ,1998 STeP-86
