Your Circulatory System Conrad J. Stora, 2017-08-01 Audisee eBooks with Audio combine professional narration and text highlighting for an engaging read-aloud experience. The circulatory system is made up of the heart, the blood, and strong tubes called blood vessels. But what does the circulatory system do? And how do its parts work together to keep your body healthy? Explore the circulatory system in this engaging and informative book. **William Harvey** Lisa Yount, 2014-12-15 In the 17th century, the English physician William Harvey described for the first time the details of the human circulatory system. Harvey discovered that the heart was a muscle and that by contracting, it pushed blood through the body. He worked out the whole pattern of the heartbeat. William Harvey's genius changed how people understood the workings of the human body. This marked one of the greatest advances in the study of medicine. Temiar Religion, 1964-2012 Geoffrey Benjamin, 2014-09-12 The Temiars, a Mon-Khmer speaking Orang Asli society living in the uplands of northern Peninsular Malaysia, have long attracted popular attention in the West for reports that ascribed to them the special psychotherapeutic technique known as Senoi Dreamwork. However, the reality of Temiar religion and society as studied and recorded by Geoffrey Benjamin is even more fascinating than that popular portrayal which he shows to be based on a serious misrepresentation of Temiar practice. When Benjamin first lived in the isolated villages of the Temiars between 1964 and 1965, he encountered a people who lived by swidden farming supplemented by hunting and fishing. They practised their own localised animistic religion in an area where the main religion was once Mahayana Buddhism and is now Islam. Half a century later, the Temiars have become much more deeply embedded in broader Malaysian society while retaining their distinctive way of life and maintaining their complex animistic religious beliefs. Benjamin's ongoing fieldwork in the 1970s, 1990s and 2000s followed the Temiars through processes of religious disenchantment and re-enchantment as they reacted in various ways to the advent of Baha'i, Islam and Christianity. Some Temiars even developed a new religion of their own. In addition to its rich ethnographic reportage, the book proposes a novel theory of religion and in the process develops a deeply insightful account of the changing intellectual framework of anthropology over the past half century.
