A Pair of Miracles Karla Akins, 2017-07-25 A parent's gripping journey of awareness, acceptance, and appreciation of her two boys dealing with significant challenges brought on by autism. Stephen Mark Shore EdD. When Karla Akins hoped that her autistic sons could learn to read and function independently, doctors warned her that those expectations would never be met. She set out to prove that despite those warnings, all things are possible through God. Laced with humor and compassion, *A Pair of Miracles* is the heartwarming story of her journey rearing adopted twin sons, each diagnosed with autism and fetal alcohol disorder. This is more than a moving biography from a mom on the front lines; however, it is a powerful tool full of practical help for parents, educators, and church members working with children who have intellectual disabilities, speech impairments, and other limitations on the autism spectrum. It is also a challenge to the church to welcome and celebrate all the members of their congregation, no matter their abilities. Thanks to Karla's determination, faith, and unconditional love, and contrary to the doctors' predictions, her adult twins are now able to function independently in many ways. They help their dad install pools, do carpentry work, and serve in the church as ushers, sound engineers, and children's ministry workers. For parents seeking hope, answers, and peace, Karla leads the way to all three down a path she's already been.

The Comprehensive Autism Planning System (CAPS) Shawn Henry, Brenda Smith Myles, 2024-08-06 The Comprehensive Autism Planning System for Individuals (CAPS) is a reflection of its creator. In his role as a state and national leader, Shawn Henry serves as an advocate for autistic individuals. Shawn and co-author Brenda Smith Myles clearly describe each element of the CAPS model in a well-organized text. Throughout the book, the authors and expert contributors highlight a variety of evidence-based strategies that correspond to each area of the CAPS. The CAPS model illustrates their ability to create meaningful change through realistic and practical means. It's a simple yet powerful system. This innovative approach helps teachers and educational teams plan and implement a student's education across the school, including the Individualized Education Program (IEP) and the curriculum relevant to the student. It takes the team through the process of planning out the goals, objectives to be targeted in each activity of the day, the modifications and accommodations that should be provided to support the student in each activity, the sensory supports needed to help the student stay engaged, and the communication and social supports for successful learning. It shows the type of data to collect for each area and helps to note what reinforcers have been shown to be successful. While this system was developed for use with individuals on the

autism spectrum it can also be an essential tool for any student regardless of the types of supports and needs they have There are also vocational and transitional formats that are available for students making the transition to work The CAPS has been updated to address current trends in special education instruction and research In this edition emphasis is placed on Inclusion Successful practices that support learning for autistic students Updated evidence based practices and case studies that apply the CAPS system to post secondary education and employment Through the CAPS autistic individuals have access to meaningful instruction that will allow them to reach their potential
