scholars on economics artificial intelligence and the physical sciences **Some New World** Peter Harrison,2024-04-18 In
his famous argument against miracles David Hume gets to the heart of the modern problem of supernatural belief We are apt
says Hume to imagine ourselves transported into some new world where the whole form of nature is disjointed and every
element performs its operation in a different manner from what it does at present This encapsulates observes Peter Harrison
the disjuncture between contemporary Western culture and medieval societies In the Middle Ages people saw the hand of
God at work everywhere Indeed many suppose that belief in the supernatural is likewise fundamental nowadays to religious
commitment But dichotomising between naturalism and supernaturalism is actually a relatively recent phenomenon just as
the notion of belief emerged historically late In this masterful contribution to intellectual history the author overturns crucial
misconceptions myths about secular modernity challenging common misunderstandings of the past even as he reinvigorates
religious thinking in the present *Science and Pseudoscience in Clinical Psychology, Second Edition* Scott O.

Mechanical Choices Michael S. Moore, 2020-05-08 Mechanical Choices details the intimate connection that exists between morality and law the morality we use to blame others for their misdeeds and the criminal law that punishes them for these misdeeds This book shows how both law and morality presuppose the accuracy of common sense a centuries old psychology that defines people as rational agents who make honorable choices and act for just reasons It then shows how neuroscience is commonly taken to challenge these fundamental psychological assumptions Such challenges four in number are distinguished from each other by the different neuroscientific facts from which they arise the fact that human choices are caused by brain events the fact that those choices don't cause the actions that are their objects but are only epiphenomenal to those choices the fact that those choices are identical to certain physical events in the brain and the fact that human subjects are quite fallible in their knowledge of what they are doing and why The body of this book shows how such challenges are either based on faulty facts or misconceived as to the relevance of such facts to responsibility The book ends with a detailed examination of the neuroscience of addiction an examination which illustrates how neuroscience can help rather than challenge both law and morality in their quest to accurately define excuses from responsibility
