Gregg,2022-11-03 The recent marches and conflicts are becoming more prevalent with people being hurt and killed The general reason given is that there are Nazis and KKK organizations that operate under a doctrine of hate but why here and why now No one has even attempted to explain why these events are becoming more common and why they are happening right now Although it is easy to label protestors as Nazis and white supremacist the fundamental questions have not been answered The astounding part of the whole question is that there seems to be very little interest in actually looking for underlying reasons that motivate people to leave their comfortable overstuffed chairs and march under a common banner I attempt to answer the question about who these people are and explain the grievances of these novice protestors During my investigation I found that my conclusions were driving me toward the very uncomfortable position of white patriarchal nationalist Through my journey I hope to shine a light on the problems facing America today and to show why these protestors are not just a natural consequence of their environment but an expected result In other words given the position that America finds herself today protests and conflicts are an expected outcome More to the point conflicts are expected to grow and become more widespread I do not ask you to join me in my expedition but by examining my trajectory of thought hopefully you will understand the fundamental nature of what is happening to our society and perhaps be able to construct operational solutions that are so desperately needed 10 Reasons The United States Will Fall Michael Mebruer,2024-10-14

The Blackpill Theory: why incels are right & you are wrong Dr. Lukas Castle, 2019-11-16 Today it seems that almost everyone has a view on what it means to be an incel and why these sexless men behave the way they do The irony is that very little of this debate is informed sincerely with scientific data or by what these men have to say This engaging book takes an in depth look at three contemporary issues lookism romantic satisfaction and modern dating by exploring how incel men experience them in a variety of circumstances As the very first published approach to inceldom of its kind Dr Lukas Castle draws on qualitative and quantitative data as well as addressing a theory of social interaction which is branded The Blackpill

This is an important and timely book into the social problem of male inceldom which be invaluable to researchers in sociology and gender studies as well as professionals concerned with men's health.

Fantasy, Online Misogyny and the Manosphere Jacob Johanssen, 2021-10-21 Nominated for the 2022 Gradiva Award. This book presents the first in depth study of online misogyny and the manosphere from a psychoanalytic perspective. The author argues that the men of the manosphere present contradictory thoughts, desires and fantasies about women which include but also go beyond misogyny. They are in a state of dis-inhibition torn between unconscious forces and fantasies which erupt and are defended against. Dis-inhibition shows itself in self-victimization and defensive apathy as well as toxic agency and symbolic power and expresses itself in desire for and hatred of other bodies. The text draws on the psychoanalytic thinkers Klaus Theweleit, Elisabeth Young Bruehl, Jessica Benjamin and Wilhelm Reich to present detailed analyses of the communities within the so-called manosphere including incels, Men Going Their Own Way (MGTOW), alt-right YouTubers and NoFap users. Drawing on wider discussions about the status of sexuality in contemporary neoliberal technoculture since the sexual revolution of the late 1960s, it illuminates how sexuality, racism and images of the white male body shape the fantasies and affects of many men on the internet and beyond. Integrating a unique theoretical framework to help understand how today's increase in online misogyny relates to the alt-right and fascism, *Online Misogyny and the Manosphere* is an important resource for academics in a variety of fields including psychoanalysis, media and communication studies, internet studies, masculinity research and more.

Language and Mediated Masculinities Robert Lawson, 2023. From television shows to the manosphere and from alt-right communities to fatherhood forums, debates about masculinity have come to dominate the media landscape. What does it mean to be a man in contemporary society? How is masculinity constituted in different media spaces? This growing cultural tension around masculinities has been discussed and analyzed both for general audiences and in burgeoning academic scholarship. What has been typically overlooked, however, is the role that language plays in these mediated performances of masculinity. In *Language and Mediated Masculinities*, Robert Lawson draws on data from newspapers, social media sites, television programs and online forums to explore language and masculinities across a range of media contexts. The book offers a critical evaluation of the intersection between language, masculinities and identities in contemporary society and addresses three key questions: How are masculinities constructed in both public and private spheres through linguistic and discursive strategies? How does language about masculinity and men affect and recreate gender ideologies in different social, political and historical contexts? What might the language of men tell us about the state of contemporary gender relations in the twenty-first century? Lawson furthers our understanding of how language is implicated in re-creating gender ideologies and how it shapes contemporary gender relations. Against a cultural backdrop of rising neoliberalism, ethnic nationalism, online radicalization, networked misogyny and fractious gender relations,

this book is an important contribution to charting how language is used to monitor evaluate and police masculinities in online and offline spaces
