Provisional Cities Renata Tysczuk, 2017-11-02 This book considers the provisional nature of cities in relation to the Anthropocene the proposed geological epoch of human induced changes to the Earth system It charts an environmental history of curfews admonitions and alarms about dwelling on Earth Provisional cities are explored as exemplary sites for thinking about living in this unsettled time Each chapter focuses on cities settlements or proxy urbanisations including past disaster zones remote outposts in the present and future urban fossils The book explores the dynamic changing and contradictory relationship between architecture and the global environmental crisis and looks at how to reposition architectural and urban practice in relation to wider intellectual environmental political and cultural shifts The book argues that these rounder and richer accounts can better equip humanity to think through questions of vulnerability responsibility and opportunity that are presented by immense processes of planetary change These are cautionary tales for the Anthropocene Central to this project is the proposition that living with uncertainty requires that architecture is reframed as a provisional practice This book would be beneficial to students and academics working in architecture geography planning and environmental humanities as well as professionals working to shape the future of cities

Murphy,2015-08-20 Persuasive Aesthetic Ecocritical Praxis continues Patrick D Murphy s focus on transversal ecocritical praxis by considering literature and cinema in terms of the persuasive force of aesthetic activity and whether or not artistic production and its criticism can be considered forms of activism Murphy argues that literature and other forms of aesthetic production hold out the promise of being able to move some individuals deeply through both affective and intellectual engagement in ways that facilitate ideological reflection To analyze aesthetic production ecocritically requires a transversal orientation in order to work continuously at accommodating a vast array of often seemingly disparate perspectives disciplines and contextual information as well as the ever changing thematic plot setting and contextual elements of the aesthetic works under consideration and the responses of changing audiences through time and across cultures Murphy demonstrates this approach through presenting theories of transversality and applying them with attention to issues of propaganda agitation and persuasion both in terms of artistic production and the criticism of such production He also brings an ecofeminist orientation to the fore with particular attention to the gendered economic aspects of environmental issues in an age of land grabs and plantation economies Along the way he treats a wide range of literary works films and miniseries In American literature he discusses realist and science fiction works from Susan Fenimore Cooper s Rural Hours to Paolo Bacigalupi s The Windup Girl Barbara Kingsolver s Flight Behavior to Kim Stanley Robinson s 2312 and Ana Castillo s So Far from God to Leslie Marmon Silko s Gardens in the Dunes In international literature he analyzes Mo Yan s The Garlic Ballads Jiang Rong s Wolf Totem Michiko Ishimure s The Lake of Heaven Miyuki Miyabe s All She Was Worth and other novels The book concludes with a reading of Ernest Callenbach s Ecotopia and Ecotopia Emerging an Afterword recommending further directions for transversal ecocritical research an and interview that discusses Murphy s previous book Transversal Ecocritical Praxis and provides some personal background on the author *Time* Joel Burges,Amy Elias,2016-08-02 The critical condition and historical motivation behind Time Studies The concept of time in the post millennial age is undergoing a radical rethinking within the humanities Time A Vocabulary of the Present newly theorizes our experiences of time in relation to developments in post 1945 cultural theory and arts practices Wide ranging and theoretically provocative the volume introduces readers to cutting edge temporal conceptualizations and investigates what exactly constitutes the scope of time studies Featuring twenty essays that reveal what we talk about when we talk about time today especially in the areas of history measurement and culture each essay pairs two keywords to explore the tension and nuances between them from past future and anticipation unexpected to extinction adaptation and serial simultaneous Moving beyond the truisms of postmodernism the collection newly theorizes the meanings of temporality in relationship to aesthetic cultural technological and economic developments in the postwar period This book thus assumes that time not space as the postmoderns had it is

central to the contemporary period and that through it we can come to terms with what contemporaneity can be for human beings caught up in the historical present In the end Time reveals that the present is a cultural matrix in which overlapping temporalities condition and compete for our attention Thus each pair of terms presents two temporalities yielding a generative account of the time or times in which we live Nebula Awards Showcase 2014 Kij Johnson, 2014-05-20 The latest volume of the prestigious anthology series published annually across six decades The Nebula Awards Showcase volumes have been published annually since 1966 reprinting the winning and nominated stories in the Nebula Awards voted on by the members of the Science Fiction Fantasy Writers of America The editor selected by SFWA's anthology committee chaired by Mike Resnick is American fantasy writer Kij Johnson author of three novels and associate director of the Center for the Study of Science Fiction at the University of Kansas This year's Nebula winners and expected contributors are Kim Stanley Robinson Nancy Kress Andy Duncan and Aliette de Bodard with E C Myers winning the Andre Norton Award for Young Adult Science Fiction and Fantasy Book **Cli-Fi and Class** Debra J. Transformed States Martin Halliwell, 2024-11-15 Transformed States offers a timely history of the politics ethics medical applications and cultural representations of the biotechnological revolution from the Human Genome Project to the COVID 19 pandemic In exploring the entanglements of mental and physical health in an age of biotechnology it views the post Cold War 1990s as the horizon for understanding the intersection of technoscience and culture in the early twenty first century The book draws on original research spanning the presidencies of George H W Bush and Joe Biden to show how the politics of science and technology shape the medical uses of biotechnology Some of these technologies reveal fierce ideological conflicts in the arenas of cloning reproduction artificial intelligence longevity gender affirmation vaccination and environmental health Interweaving politics and culture the book illustrates how these health issues are reflected in and

challenged by literary and cinematic texts from *Oryx and Crake* to *Annihilation* and from *Gattaca* to *Avatar*. By assessing the complex relationship between federal politics and the biomedical industry, *Transformed States* develops an ecological approach to public health that moves beyond tensions between state governance and private enterprise. To that end, Martin Halliwell analyzes thirty years that radically transformed American science, medicine, and policy, positioning biotechnology in dialogue with fears and fantasies about an emerging future in which health is ever more contested. Along with the two earlier books, *Therapeutic Revolutions* (2013) and *Voices of Mental Health* (2017), *Transformed States* is the final volume of a landmark cultural and intellectual history of mental health in the United States, journeying from the combat zones of World War II to the global emergency of COVID-19.
