

Accounting Chapter 5: Receivables (p.299)

1. ACCOUNTS & NOTES RECEIVABLE

1.1 TYPES OF RECEIVABLES

Receivables: monetary claims against others

1) Accounts receivables (trade receivables, debtors): amounts collectible from customers from the sale of goods & services

- classified as current asset as it represents future economic benefits and can be measured reliably through invoice, contract → accounts receivables account serves as control account

2) Notes receivables (promissory notes): more formal accounts; borrower signs written promise to pay lender sum + interest at future date; sometimes borrower needs to pledge security for loan

3) Other receivables: various advances and loans to employees and other parties

1.2 INTERNAL CONTROL OVER CASH COLLECTIONS ON ACCOUNT

- cash-handling & cash-accounting duties must be separated
- best solution: customers send cash to banks and those then forwards the remittance advice to the firm's bookkeeper who credits the customer account (takes away the liability).

2. ACCOUNTING FOR UNCOLLECTIBLE RECEIVABLES

- **benefits of selling on credit:** customers who cannot pay cash can still buy → sales increase
 - **costs of selling on credit:** some customers do not pay
- **uncollectible-account expense (bad debt/impairment of receivables expense):** operating expense (two methods to account the expense – allowance & direct write-off)

2.1 ALLOWANCE METHOD

LOSS EVENTS THAT LEAD TO RECEIVABLES BEING IMPAIRED

- financial difficulty (bankruptcy) by debtor
 - breach of contract by debtor (default or inability to make payment)
 - adverse changes in number of delayed payments in general
 - national or local economic conditions that correlate with defaults by debtors in general
- firm then records an estimated amount of uncollectible expenses and sets up *allowance for uncollectible receivables account* = *contra account to accounts receivables*

METHOD FOR ESTIMATING UNCOLLECTIBLES – AGING OF RECEIVABLES

- classifies receivables into age groups and assigns percentage of not being able to collect it to each group → *determines allowance for each group vertically & then adds up*
- **limitation:** only determines vertically but not horizontally, does not consider that one specific customer could default and all his payments (in each group) would be impaired

Age of Account (Dollar amounts in millions)					
Customer	1-30 Days	31-60 Days	61-90 Days	Over 90 Days	Total Balance
Star-Bell Phone (Star)					
Trade	\$2,500	\$1,000	\$1,500	\$1,000	\$6,000
Estimated percent uncollectible	0.1%	0.2%	0.7%	0.33%	
Allowance for Uncollectibles	\$2,500	\$2,000	\$1,050	\$3,300	\$8,850

2century Accounting Chapter 5

T. A. Lee,A. Bishop,R. H. Parker

2century Accounting Chapter 5:

Two Hundred Years of Accounting Research Richard Mattessich, 2007-11-15 This is the first and only book to offer a comprehensive survey of accounting research on a broad international scale for the last two centuries Its main emphasis is on accounting research in the English German Italian French and Spanish language areas it also contains chapters dealing with research in Finland the Netherlands Scand

Measuring and Accounting for Innovation in the Twenty-First Century Carol Corrado, Jonathan Haskel, Javier Miranda, Daniel Sichel, 2021-05-12 Measuring innovation is a challenging task both for researchers and for national statisticians This task is timely and valuable given that policy and public interest in innovation has become increasingly intense in this era of digital revolution yet National GDP Accounts and other economic statistics do not fully account for the wide range of innovative activity that is plainly evident in everyday experience Indeed innovation has in many ways changed the structure of an increasingly digitized marketplace from cloud computing to the gig economy The papers collected in this volume Measuring and Accounting for Innovation in the Twenty First Century address many different dimensions of this challenge ranging from how to best to define GDP to the fundamental question of what is an innovation and how to collect data at the level of an individual innovation Taken together the volume provides a comprehensive overview of the cutting edge of this widely varied but thematically connected research that draws on multiple methodologies and data The editors and authors consider how measurement frameworks could be expanded to enhance our understanding of innovative activity new approaches and evidence that could account for innovation s economic impact innovation s effect across the economy from production processes to labor markets and financial activities and what practical adjustments could be made to current measurements that would better capture innovation The distinctive stance of this volume makes clear that the challenge of measuring innovation and understanding its implications has become increasingly complex as the economy has evolved The editors and authors show that the limitations of our existing measurement system significantly hinder researchers analysts and policymakers Better measures of innovative activity are necessary to interpret the consequences of innovation in daily life and to inform policies that best promote the attendant benefits including distribution of income trademark protections and more Now in an era of fake news and alternative facts it is more important than ever to push for accuracy in basic economic facts

Harold Cecil Edey Martin E. Persson, 2019-09-30 Harold Cecil Edey was instrumental in the development of British accounting thought in the mid 1900s and his scholarship influenced a generation of students This edited collection of his unpublished manuscripts sheds light on his contribution to modern accounting thought

Accounting History from the Renaissance to the Present T. A. Lee, A. Bishop, R. H. Parker, 2014-06-23 First published in 1996 This book summarises the Seminar held in Edinburgh in 1994 in the five hundredth year since the publication of Luca Pacioli s Summa de Arithmetica Geometria Proportioni et Proportionalita Its purpose is simple but relevant to every accountant It revisits some fundamentals that lay behind Pacioli s decision to write his Summa and

examines whether the accounting framework in which we work today has overlooked basic issues because of its continued focus on development of the existing financial accounting model It analyses Pacioli s legacy from several different perspectives deliberately choosing to do so in ways that addressed considerations that his work reflected examining the nature and characteristics of the bridge between academic analysis and insight on the one hand and practical application on the other It also looks at the dominant influences in the evolution of accountancy for managing stewardship and for reporting of that stewardship By doing so it attempts to identify influences that had been less pressing and so had been ignored or overlooked and also considers how changing technology has affected the way we manage the accountancy process

Accounting for History in Marx's Capital Robert Bryer, 2019-06-25 Accounting for History uses the accounting interpretation of Marx s theories of history and value to explain and defend his prediction of the inevitability of socialism as the end of history In addition to the technological and institutional development of advanced capitalism Bryer argues that the key necessary conditions are that workers see through capitalist ideology understanding that Marx s theory of value explains why the phenomenal forms appearing in capitalist accounts are distortions of the underlying social reality and that demystified accounting is integral to his concept of socialism on Day One To get to Day One the book concludes Marx left Marxists the tasks of critical accounting

20th Century Bookkeeping and Accounting James Williams Baker, Alva LeRoy Prickett, 1928

Anarchist Accounting Anders Sandström, 2020-11-29 This book is about accounting in an alternative libertarian socialist economic system It explores what information and transactions we need to enable democratic and effective financial decisions by those affected by the decisions Based on the economic model participatory economics the author proposes a set of accounting principles for an economy comprised of common ownership of productive resources worker and consumer councils and democratic planning promoting the model s core values The author tackles questions such as how accounting could be organised in an economy with no private equity owners or private lenders and creditors that is not based on greed and competition but instead on cooperation and solidarity A large part of the book is focused on issues regarding investments thus he asks how and on what basis decisions are made about the allocation of an economy s production between consumption today and investments that enable more consumption in the future and how investments are accounted for He also considers how investments in capital assets and production facilities would be decided financed and valued if they are not owned by private capital owners and if allocation does not take place through markets but through a form of democratic planning In answering these questions and more the author demonstrates that alternative economic systems are indeed possible and not merely lofty utopias that cannot be put into practice and inspires further discussion about economic vision By applying accounting to a new economic setting and offering both technical information and the author s bold vision this book is a comprehensive and valuable supplementary text for courses touching on critical accounting theory It will also appeal to readers interested in alternative kinds of economies

Extending Schumacher's Concept of

Total Accounting and Accountability into the 21st Century Kala Saravanamuthu, 2009-03-23 Intends to posit Schumacher's Middle Way thinking in the context of growing concerns about global warming and climatic changes and teases out its implications for holistic accountability by introducing readers to the science of climate change and its implications for managing natural resources

Twentieth Century Accounting Thinkers (RLE Accounting) J. Edwards, 2014-02-05 When originally published in 1994 this volume was the first international review of accounting theory to focus on the contributions of its leading thinkers Very few attempts had been made in the accounting literature to assess the contribution of the theorists who have had such an important influence on the direction of research and practice Written by experts the studies in this volume provide a unique guide to the development of accounting theory and practice in regions as diverse as the USA Japan and Europe

Lordship and State Transformation Stephan Sander-Faes, 2024-12-17 Although state transformation continuous struggle and bargaining between rulers and their subjects producing an unpredictable variety of political structures is often overlooked the process is crucial in assessing the organizational development of early modern composite monarchies and deserves further investigation In Austria the monarchy's emergence as a great power required it to overcome several successive crises that culminated in the decades around 1700 The Habsburgs succeeded more by adjusting relations between Crown and lordships than through institution building This unusual interaction of state and non state actors resulted in an Austria that markedly deviated from the centralizing nation state exemplified by Britain or France The nascent Habsburg fiscal financial military regime transformed regional and local authority leading to armed conflict and causing disintegration of the administrative and social fabric From the mid seventeenth century onward power whether local or central or social or political would undergo enormous changes Grounded in extensive research into Czech archives and spanning an era from the Thirty Years War to the coronation of Charles VI *Lordship and State Transformation* delves into the complex transitions that characterized the first instance of a balance of power in Europe with a focus on its underresearched great power the Habsburg monarchy

Accounting for health Axel C. Hüntelmann, Oliver Falk, 2021-01-12 Whether in the Swiss countryside or in a doctor's office in Boston in German English or French hospitals or within multinational organizations with early vaccinations or with new pharmaceuticals from Big Pharma today or in early modern Saxon mining towns or in Prussian military healthcare for at least 500 years accounting has been an essential part of medical practice with significant moral social and epistemological implications Covering the period between 1500 2000 the book examines in short case studies the importance of calculative practices for medicine in very different contexts Thus *Accounting for Health* offers a synopsis of the extent to which accounting not only influenced medical practices over centuries but shaped modern medicine as a whole

Venice's Secret Service Ioanna Iordanou, 2019-10-28 Venice's Secret Service is the untold and arresting story of the world's earliest centrally organised state intelligence service Long before the inception of SIS and the CIA in the period of the Renaissance the Republic of Venice had masterminded a remarkable centrally organised state

intelligence organisation that played a pivotal role in the defence of the Venetian empire Housed in the imposing Doge's Palace and under the direction of the Council of Ten the notorious governmental committee that acted as Venice's spy chiefs this proto modern organisation served prominent intelligence functions including operations intelligence and covert action analysis cryptography and steganography cryptanalysis and even the development of lethal substances Official informants and amateur spies were shipped across Europe Anatolia and Northern Africa conducting Venice's stealthy intelligence operations Revealing a plethora of secrets their keepers and their seekers Venice's Secret Service explores the social and managerial processes that enabled their existence and that furnished the foundation for an extraordinary intelligence organisation created by one of the early modern world's most cosmopolitan states

Developing Control Concepts in the Twentieth Century (RLE Accounting) Lee Parker,2013-12-04 This book examines the conceptual development of control

in the literature of both management and accounting disciplines from 1900 to 1980 In order to portray the development of control concepts over time the chapters are organized into sections relating to the schools of thought from which they emanated and a model of control is constructed to represent each group of concepts and their hypothesised inter relationships Having traced the development of control models a comparative analysis of historical development in the two streams of management and accounting literature is undertaken This analysis reveals a pronounced lag of accounting development behind that of management literature The reasons for this are then discussed

Private Money and Public Currencies: The Sixteenth Century Challenge M.-T.Boyer- Xambeau,A. Azodi,2016-07-01 First Published in 1994 Writing as a unified team the authors three French economists they insist they are economists not economic historians though they are steeped in the monetary financial economic social and political history of Europe in the sixteenth century have written a fascinating account of the development of means of payment at the end of the Renaissance and the beginning of the modern period The account is limited for the most part to what they call Latin Christianity primarily France Italy and Spain It describes both the development of an integrated circuit of intra European payments by means of bills of exchange negotiated at trade and payment fairs and the emergence of national systems of money of account and metallic coins at the hands of the monarchs of the emerging state system

Death by Drama and Other Medieval Urban Legends Jody Enders,2005-05-15 Part of every legend is true Or so argues Jody Enders in this fascinating look at early French drama and the way it compels us to consider where the stage ends and where real life begins This ambitious and bracing study explores fourteen tales of the theater that are at turns dark and dangerous sexy and scandalous humorous and frightening stories that are nurtured by the confusion between truth and fiction and imitation and enactment until it becomes impossible to tell whether life is imitating art or art is imitating life Was a convicted criminal executed on stage during a beheading scene Was an unfortunate actor driven insane while playing a madman Did a theatrical enactment of a crucifixion result in a real one Did an androgynous young man seduce a priest when portraying a female saint Enders answers these and other questions

while presenting a treasure trove of tales that have long seemed true but are actually medieval urban legends On topics ranging through politics religion marriage class and law these tales Enders argues do the cultural work of all urban legends they disclose the hopes fears and anxieties of their tellers Each one represents a medieval meditation created or dramatized by the theater with its power to blur the line between fiction and reality engaging anyone who watches performs or is represented by it Each one also raises pressing questions about the medieval and modern world on the eve of the Reformation when Europe had never engaged more anxiously and fervently in the great debate about what was real what was pretend and what was pretense Written with elegance and flair and meticulously researched *Death by Drama and Other Medieval Urban Legends* will interest scholars of medieval and Renaissance literature history theater performance studies and anyone curious about urban legends

The End of Accounting and the Path Forward for Investors and Managers
Baruch Lev, Feng Gu, 2016-06-14 An innovative new valuation framework with truly useful economic indicators *The End of Accounting and the Path Forward for Investors and Managers* shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative Based on a comprehensive large sample empirical analysis this book reports financial documents continuous deterioration in relevance to investors decisions An enlightening discussion details the reasons why accounting is losing relevance in today's market backed by numerous examples with real world impact Beyond simply identifying the problem this report offers a solution the Value Creation Report and demonstrates its utility in key industries New indicators focus on strategy and execution to identify and evaluate a company's true value creating resources for a more up to date approach to critical investment decision making While entire industries have come to rely on financial reports for vital information these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate This book demonstrates an alternative giving you a new framework for more informed decision making Discover a new comprehensive system of economic indicators Focus on strategic value creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable up to date information Major corporate decisions such as restructuring and M A are predicated on financial indicators of profitability and asset liabilities values These documents move mountains so what happens if they're based on faulty indicators that fail to show the true value of the company *The End of Accounting and the Path Forward for Investors and Managers* shows you the reality and offers a new blueprint for more accurate valuation

Cost Accounting in Government Zachary Mohr, 2017-04-21 Managerial cost accounting is the financial and managerial tool that is used to estimate the organizational cost of products and services in business and government In recent decades cost accounting in the United States and other advanced industrial countries has been dominated by discussions of Activity Based Costing or ABC While ABC can be shown to produce a more accurate estimate of cost than older and more basic types of cost accounting ABC is not used extensively in many governments We argue that this recent focus on ABC has stifled

examination and discussion of how government cost accounting is being used and how it could be used in practice The study of cost accounting practice reveals an important and underexplored area of financial management in government Given the scandals that cost accounting estimates can create and that different types of cost accounting can create different estimates of cost it may be reasonable to ask whether the cost accounting exercise is worth it Cost Accounting in Government Theory and Applications addresses these unusual and unusually important topics through a series of studies of different government cost accounting practices The first section of the book presents two chapters on the history and basic elements of cost accounting The second section of the book provides further discussion and case studies of actual cost accounting practices in the main areas that cost accounting has been used in government benchmarking the performance of government services rate setting grant overhead cost recovery and cost management The last two chapters discuss cost accounting practices in Europe and the future of cost accounting These cases span local and federal governments and provide a much needed context to the study of cost accounting in government Aimed at academics researchers and policy makers in the fields of Accounting Public Administration and Government Studies Cost Accounting in Government Theory and Applications seeks to address the practical and theoretical gap in government cost accounting research with case studies of different public agencies that are using cost accounting for different purposes The case studies illustrate that different purposes for cost accounting create unique and interesting cost accounting practices The case studies provide useful examples of actual cost accounting systems that can inform both research and instruction

Professional Translators in Nineteenth-Century France

Susan Pickford, 2024-12-26 This book shines a light on the practices and professional identities of translators in nineteenth century France speaking to the translatorial turn in translation studies which spotlights translators as active agents in the international circulation of texts The volume charts the sociocultural legal and economic developments which paved the way for the development of the professional translation industry in France in the period following the French Revolution through to the First World War Drawing on archival material from French publishers institutional archives and translators own discourses and applying historiographical methodologies Pickford explores the working conditions of professional translators during this time and the subsequent professional identities which emerged from the collective practice of translation across publishing business and government In its diachronic approach to translators practices and identities the book aims to recover the collective contributions of these translators and in turn paves the way for a new approach to translator history from below The volume will appeal to students and scholars in translation studies particularly those with an interest in literary translation translation history and translator practices

Historical Developments in the Accountancy Profession, Financial Reporting, and Accounting Theory C. Richard Baker, Martin E. Persson, 2021-11-15 Historical Developments in the Accountancy Profession Financial Reporting and Accounting Theory contains ten manuscripts authored by C Richard Baker during an academic career that spans four decades picking up on various understudied threads of academic and professional

initiatives over the past several hundred years

The Balance Sheet ,1925

Reviewing **2century Accounting Chapter 5**: Unlocking the Spellbinding Force of Linguistics
