**Protecting User Privacy in Web Search Utilization** Khan, Rafi Ullah, 2023-04-25 Online user privacy is a delicate issue that has been unfortunately overlooked by technology corporations and especially the public since the birth of the internet. Many online businesses and services such as web search engines, retailers, and social network sites exploit user data for profit. There is a misconception among people about the term privacy. Usually, people think that privacy is the ability of an individual to isolate themselves or that it is a person's right to control access to their personal information. However, privacy is not just about revealing secret information; it also includes exploiting user personal data as the exploitation of personal data may lead to disastrous consequences. Protecting User Privacy in Web Search Utilization presents both multidisciplinary and interdisciplinary works on questions related to experiences and phenomena that can or could be covered by concepts regarding the protection and privacy of web service users. It further highlights the importance of web search privacy to the readers and educates them about recent developments in the field. Covering topics such as AI-based intrusion detection, desktop search engines, and privacy risks, this premier reference source is an essential resource for students and educators of higher education, data experts, privacy professionals, and engineers. IT managers, software developers, government officials, archivists, and librarians, privacy rights activists, researchers, and academicians.

**Deep Learning and Its Applications for Vehicle Networks** Fei Hu, Iftikhar Rasheed, 2023-05-12 Deep Learning (DL) is an effective approach for AI-based vehicular networks and can deliver a powerful set of tools for such vehicular network dynamics. In various domains of vehicular networks, DL can be used for learning-based channel estimation, traffic flow prediction, vehicle trajectory prediction, location prediction, based scheduling and routing, intelligent network congestion control mechanism, smart load balancing, and vertical handoff control, intelligent network security strategies, virtual smart and efficient resource allocation, and intelligent distributed resource allocation methods. This book is based on the work from world famous experts on the application of DL for vehicle networks. It consists of the following five parts: I DL for vehicle safety and security. This part covers the use of DL algorithms for vehicle safety or security. II DL for effective vehicle communications. Vehicle networks consist of vehicle-to-vehicle and vehicle-to-roadside communications. This part covers how intelligent vehicle networks require a flexible selection of the best path across all vehicles, adaptive sending rate control based on bandwidth availability, and timely data downloads from a roadside base station. III DL for vehicle control. The myriad operations that require intelligent control for each individual vehicle are discussed in this part. This also includes emission control, which is based on the road traffic situation, the charging pile load is predicted through DL, and vehicle speed adjustments based on the camera-captured image analysis. IV DL for information management. This part covers some intelligent information collection and understanding. We can use DL for energy saving, vehicle trajectory control based on the road traffic situation, and given destination information, we can also natural language processing based on DL algorithm for automatic internet of things (IoT) search during driving. V Other

applications This part introduces the use of DL models for other vehicle controls Autonomous vehicles are becoming more and more popular in society The DL and its variants will play greater roles in cognitive vehicle communications and control Other machine learning models such as deep reinforcement learning will also facilitate intelligent vehicle behavior understanding and adjustment This book will become a valuable reference to your understanding of this critical field
