*Angels and Superheroes* Jack M. Jose,Krista L. Taylor,2018-02-09 The school accountability movement's focus solely on improving standardized test scores is dehumanizing There is no standardized child In the rush to quantify evaluate and ostensibly improve the American educational system we have forgotten that education is complicated Any attempt to distill it into a simplistic measure will fall short and will compromise the nobility of the work How can teachers continue to do the incredibly challenging work of effective education in an environment that can be downright damaging We can save the soul of education by resisting the dehumanization of students Teachers can shield children by embracing social emotional learning building trust and displaying compassion There is no quick fix to creating a nurturing relationship There is no single data point that can measure it Teachers must commit to being present paying attention maintaining consistency engaging in hard work practicing humility and working together *Angels and Superheroes* provides specific reproducible practices designed to help teachers cultivate trust and compassion while managing the pressures of the testing movement With time proven theories and cutting edge research this book provides engaging examples concrete strategies and implementable resources to support teachers in bridging the divide between why they chose this career field the children and that which is currently being required of them the test scores

*A Chronicle of Echoes* Mercedes K. Schneider,2014-04-01 Corporate reform is not reform at all Instead it is the systematic destruction of the foundational American institution of public education The primary motivation behind this destruction is greed Public education in America is worth almost a trillion dollars a year Whereas American public education is a democratic institution its destruction is being choreographed by a few wealthy well positioned individuals and organizations This book investigates and exposes the handful of people and institutions that are often working together to become the driving force behind destroying the community public school

*Learning to Read in Our Nation's Schools* Judith A. Langer,1990 To assess the reading achievement of American school children the National Assessment of Educational Progress NAEP surveyed nationally representative samples of approximately 13 000 students at grades 4 8 and 12 attending public and private schools across the nation Students read a variety of literary and informative passages and then answered a series of multiple choice and open ended questions

designed to measure their ability to read and comprehend these passages In addition students provided background information about their reading experiences both in and out of school To supplement this information the teachers of fourth graders participating in the assessment completed a questionnaire about the instruction their students received Findings indicated that 1 the average reading proficiency of students increased substantially from grades 4 to 8 and less dramatically from grades 8 to 12 2 at all three grade levels there were great differences in reading proficiency according to socioeconomic status 3 more proficient readers reported home and school environments that emphasized academic achievement 4 students reported doing very little reading in school and for homework 5 students interest in books seems to decrease as they progress through school 6 emphasis on beginning reading instruction in grades 1 2 and 3 is overwhelmingly phonics based 7 instruction for most fourth graders is based on a single basal reader and 8 reasoning activities are not emphasized in class Extensive tables of data are included a procedural appendix and an appendix of data are attached NKA     **The NAEP ...
