Situatedness and Place Thomas Hünefeldt,Annika Schlitte,2018-10-23 This book explores the ways in which the spatio temporal contingency of human life is being conceived in different fields of research Specifically it looks at the relationship between the situatedness of human life the situation or place in which human life is supposed to be situated and the dimensions of space and time in

which both situation and place are usually themselves supposed to be situated Over the last two or three decades the spatio temporal contingency of human life has become an important topic of research in a broad range of different disciplines including the social sciences the cultural sciences the cognitive sciences and philosophy However this research topic is referred to in quite different ways while some researchers refer to it in terms of situation emphasizing the situatedness of human experience and action others refer to it in terms of place emphasizing the power of place and advocating a topological or topographical turn in the context of a larger spatial turn Interdisciplinary exchange is so far hampered by the fact that the notions referred to and the relationships between them are usually not sufficiently questioned This book addresses these issues by bringing together contributions on the spatio temporal contingency of human life from different fields of research

sovereignty and whose mechanisms include the entrenchment of basic constitutional commitments and party bans Schmitt's state and constitutional theory remains important the problems he identified continue to exist within liberal democratic states Schmitt offers democrats today a novel way to understand the legitimacy of liberal democracy and the limits of constitutional change Advances in Mathematics Education Research on Proof and Proving Andreas J. Hegel on the Proofs and the Personhood of God Robert R. Williams, 2017-01-19

Hegel's analysis of his culture identifies nihilistic tendencies in modernity i.e. the death of God and end of philosophy Philosophy and religion have both become hollowed out to such an extent that traditional disputes between faith and reason become impossible because neither any longer possesses any content about which there could be any dispute this is nihilism Hegel responds to this situation with a renewal of the ontological argument Logic and ontotheology which takes the form of philosophical trinitarianism Hegel on the Proofs and the Personhood of God examines Hegel's recasting of the theological proofs as the elevation of spirit to God and defense of their content against the criticisms of Kant and Jacobi It also considers the issue of divine personhood in the Logic and Philosophy of Religion This issue reflects Hegel's antiformalism that seeks to win back determinate content for truth Logic and the concept of God While the personhood of God was the issue that divided the Hegelian school into left wing and right wing factions both sides fail as interpretations The center Hegelian view is both virtually unknown and the most faithful to Hegel's project What ties the two parts of the book together Hegel's philosophical trinitarianism or identity as unity in and through difference Logic and his theological trinitarianism or incarnation trinity reconciliation and community Philosophy of Religion is Hegel's Logic of the Concept Hegel's metaphysical view of personhood is identified with the singularity *Einzelheit* of the concept This includes as its speculative nucleus the concept of the true infinite the unity in difference of infinite finite thought and being divine human unity incarnation and trinity God as spirit in his community
