The Princeton Review realizes that acing the Chemistry exam is very different from getting straight As in school.

The Princeton Review doesn't try to teach students everything there is to know about chemistry; only the techniques they'll need to score higher on the exam.

There's a big difference. In *Cracking the Virginia SOL EOC Chemistry*, TPR will teach test takers how to think like the test makers and score higher by mastering what test takers need to know with proven techniques.

Use word association to solve problems when unsure of the correct answers. Ace the exam by understanding the logic of the test makers and applying it to solutions.

This book includes 2 full length simulated exams. All of TPR's sample test questions are just like the ones test takers will see on the actual End of Course Chemistry exam, and TPR fully explains every solution.
