History of Acquisition in the Department of Defense, Volume 1 Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman s tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look s stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of acquisition policies organizations and processes and the various forces influencing weapons programs

Titan II David K. Stumpf, 2002-07-01 The Titan II ICBM intercontinental ballistic missile program was developed by the United States military to bolster the size strength and speed of the nation s strategic weapons arsenal in the 1950s and 1960s Each missile carried a single warhead the largest in U S inventory used

liquid fuel propellants and was stored and launched from hardened underground silos. The missiles were deployed at basing facilities in Arkansas, Arizona, and Kansas and remained in active service for over twenty years. Since military deactivation in the early 1980s, the Titan II has served as a reliable satellite launch vehicle. This is the richly detailed story of the Titan II missile and the men and women who developed and operated the system. David K. Stumpf uses a wide range of sources, drawing upon interviews with and memoirs by engineers and airmen as well as recently declassified government documents and other public materials. Over 170 drawings and photographs, most of which have never been published, enhance the narrative. The three major accidents of the program are described in detail for the first time using authoritative sources. Titan II will be welcomed by librarians for its prodigious reference detail, by technology history professionals and laymen, and by the many civilian and Air Force personnel who were involved in the program, a deterrent weapons system that proved to be successful in defending America from nuclear attack.

Nuclear Shadowboxing: Contemporary Threats from Cold War Weaponry; Volume 1: Cold War Redux Alexander DeVolpi, Vladimir E. Minkov, Vadim A. Simonenko, George S.

Stanford, 2004 *Eisenhower, Science Advice, and the Nuclear Test-Ban Debate, 1945-1963* Benjamin P. Greene, 2007. Based on extensive research in government archives and private papers, this book analyzes the secret debate within the Eisenhower administration over the pursuit of a nuclear test ban agreement. In contrast to much recent scholarship, this study concludes that Eisenhower strongly desired to reach an accord with the Soviet Union and the United Kingdom to cease nuclear weapons testing. For Eisenhower, a test ban would ease Cold War tensions, slow the nuclear arms race, and build confidence toward disarmament; however, he faced continual resistance from his early scientific advisers, most notably Lewis L. Strauss and Edward Teller. Extensive research into previously unavailable government archival sources and collections of private manuscripts reveals the manipulative acts of test ban opponents and other factors that inhibited Eisenhower's actions throughout his presidency. Meticulously analyzed, these sources underscore Eisenhower's dependence on the counsel of his science advisors, such as Strauss, James R. Killian, and George B. Kistiakowsky, to determine the course he pursued in regard to several components of his national security strategy. In addition to its comprehensive analysis of the test ban debate, this book makes important contributions to the scholarly literature assessing Eisenhower's leadership and his approach to arms control.

Rearming for the Cold War, 1945-1960 Elliott Vanveltner Converse, 2012. Book Description: The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense, author Elliott Converse presents a meticulously researched overview of changes in acquisition policies, organizations, and processes within the United States military establishment during the decade and a half following World War II. Many of the changes that shaped the nature and course of weapons research and development, production, and contracting through the end of the century were instituted between 1945 and 1960; many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years. This study is the first to combine the histories of the

Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods **A History of U.S. Nuclear Testing and Its Influence on Nuclear Thought, 1945-1963** David M. Blades, Joseph M.

Siracusa, 2014-05-01 The story of U S nuclear testing between 1945 and 1963 is a vivid and exciting one but also one of profound importance It is a story of trailblazing scientific progress weapons of mass destruction superpower rivalry accidents radiological contamination politics and diplomacy The testing of weapons that defined the course and consequences of the Cold War was itself a crucial dimension to the narrative of that conflict Further the central question Why conduct nuclear tests was fully debated among American politicians generals civilians and scientists and ultimately it was victory for those who argued in favor of national security over diplomatic and environmental costs that normalized nuclear weapons tests A History of U S Nuclear Testing and Its Influence on Nuclear Thought 1945 1963 is an examination of this question beginning with the road to normalization and later de normalization of nuclear testing leading to the Nuclear Test Ban Treaty in 1963 As states continue to pursue nuclear weaponry nuclear testing remains an important political issue in the twenty first century

The Nuclear Club Jonathan R. Hunt, 2022-11-29 The Nuclear Club reveals how a coalition of powerful and developing states embraced global governance in hopes of a bright and peaceful tomorrow While fears of nuclear war were ever present it was the perceived threat to their preeminence that drove Washington Moscow and London to throw their weight behind the 1963 Limited Test Ban Treaty LTBT banishing nuclear testing underground the 1967 Treaty of Tlatelolco banning atomic armaments from Latin America and the 1968 Nuclear Non Proliferation Treaty NPT forbidding more countries from joining the most exclusive club on Earth International society the Cold War and the imperial U S presidency were reformed from 1945 to 1970 when a global nuclear order was inaugurated averting conflict in the industrial North and yielding what George Orwell styled a peace that is no peace everywhere else Today the nuclear order legitimizes foreign intervention worldwide empowering the nuclear club and above all the United States to push sanctions and even preventive war against atomic outlaws all in humanity s name **IELTS 5 Practice Tests, Academic Set 1** Simone Braverman, Robert

web lmso algorithm the least mean square lms and the normalized least mean square nlms algorithms require a trade off between fast convergence and low misadjustment obtained by choosing the control parameters in general time variable parameters are proposed according to different rules

nlms algorithm demo file exchange matlab central - Feb 26 2022

web mar 31 2016 overview functions version history reviews 20 discussions 5 nlms is one of the adaptive filter algorithms in this file an experiment is made to identify a linear noisy system with the help of nlms algorithm the weights of the estimated system is nearly identical with the real one

implementation in c of least mean square lms algorithm - Jul 02 2022

web may 27 2013 in a project for my bachelor of science degree i have to implement in c a lms algorithm the algorithm is put in an iir noth filter the error signal for the adaptive filter is $e(n) = y(n) - \hat{y}(n)$ i implemented the algorithm but it doesn't work i applied a signal at the input of the filter the signal is a sinusoid limited at half of the amplitude

matlab nlms algorithm is not converging multiple - Jan 28 2022

web sep 2 2015 the normalized least mean square algorithm is used in digital filtering it basically tries to imitate an unknown filter so their difference which is considered the error tends to zero the factor of convergence is that the error will start very high and with the continuous run of the algorithm it will be smaller

an overview on optimized nlms algorithms for acoustic echo - Nov 06 2022

web nov 19 2015 the jo nlms algorithm requires the estimation of three main parameters i e σ_x^2 σ_v^2 and σ_w^2 the first one can be easily evaluated as in the nlms algorithm i e $\widehat{\sigma_x^2} = \frac{1}{n} \sum_{t=1}^n \mathbf{x}^T \mathbf{x}$

active noise cancellation using adaptive filter algorithms - Jun 01 2022

web noise cancellation using adaptive filter algorithms i least mean square lms algorithm in the lms algorithm the coefficients are adjusted from sample to sample in such a way as to minimize the mean square error mse the lms is based on the steepest descent algorithm where the weight vector is updated from

normalized least mean square nlms padasip 1 2 1 - Apr 11 2023

web the nlms is extension of lms filter see least mean square lms for explanation of the algorithm behind the extension is based on normalization of learning rate the learning rate μ is replaced by learning rate η_k normalized with every new sample according to input power as follows
