

18.3 Building the Tree of Life

Lesson Objectives

-  Name the six kingdoms of life as they are currently identified.
-  Explain what the tree of life represents.

Lesson Summary

Changing Ideas About Kingdoms As biologists learned more about the natural world, they realized that Linnaeus's two kingdoms, Animalia and Plantae, did not represent all life.

- ▶ Researchers found that microorganisms were very different from plants and animals. They were placed in their own kingdom, called Protista.
- ▶ Then, yeast, molds, and mushrooms were separated from plants and placed in their own kingdom, called Fungi.
- ▶ Because bacteria lack nuclei, mitochondria, and chloroplasts, they were separated from Protista and placed in another new kingdom, called Monera.
- ▶ In the 1990s, kingdom Monera was divided into two kingdoms: Eubacteria and Archaeobacteria. The six-kingdom system of classification includes the kingdoms Eubacteria, Archaeobacteria, Protista, Fungi, Plantae, and Animalia.
- ▶ Genetic analysis revealed that two prokaryotic groups are even more different from each other, and from Eukaryotes, than previously thought. This discovery led to the creation of a new taxon, called the domain. The **domain** is a larger, more inclusive category than a kingdom. The three domain system consists of: Bacteria, Archaea, and Eukarya.
- ▶ Domain Bacteria corresponds to the kingdom Eubacteria. Domain Archaea corresponds to the kingdom Archaeobacteria. Domain Eukarya corresponds to kingdoms Fungi, Plantae, Animalia, and "Protista."
- ▶ Quotations are used for the old kingdom Protista to signify that it is not a valid clade.

The Tree of All Life The tree of life shows current hypotheses regarding evolutionary relationships among taxa within the three domains of life.

- ▶ The domain **Bacteria** includes unicellular organisms without a nucleus. They have cell walls containing a substance called peptidoglycan.
- ▶ The domain **Archaea** also includes unicellular organisms without a nucleus. These organisms have cell walls that do not contain peptidoglycan.
- ▶ The domain **Eukarya** includes the four remaining kingdoms: "Protista," Fungi, Plantae, and Animalia. All members of the domain Eukarya have cells with a nucleus.
 - Most members of the kingdom "Protista," are unicellular organisms. Some Protista are photosynthetic; others are heterotrophs.
 - Most members of the kingdom Fungi are multicellular, and all members of this kingdom are heterotrophs with cell walls containing chitin.
 - All members of the kingdom Plantae are multicellular and photosynthetic. Most plants cannot move about, and their cells have cell walls.
 - All members of the kingdom Animalia are multicellular heterotrophs. Most animals can move about, and their cells lack cell walls.

Toward an Interpretation of the Book of Proverbs Zoltán S. Schwáb, 2013-08-15 Major religious themes of the Bible such as election and covenant are not mentioned in the book of Proverbs Furthermore self interest underlies its motivational system you shall behave well because it will be good for you These selfish and secular features have posed serious ethical and theological challenges for some interpreters while others have claimed that their presence is only in the eyes of the beholder After a thorough investigation of the history of Proverbs interpretation in the nineteenth and twentieth centuries Zolt n Schw b argues that its self interested and secular nature should not be simply affirmed or dismissed The question is not whether Proverbs is selfish and secular but in what ways it is selfish and secular and within what conceptual framework one is supposed to interpret these characteristics In order to construct a proper framework Schw b uses such diverse sources as Thomas Aquinas theological ethics modern secularization theories ancient Near Eastern temple ideology and the theological tradition of God s incomprehensibility The result is a reading that simultaneously reflects on the ancient context of the text and the concerns of its readers in a secular world **Publishers' Circular** ,1870 Publishers' circular and booksellers' record ,1870 **Catalogue of the Library of the Late William Gifford ...** William Gifford,1829 **Canon, Covenant and Christology** Matthew Barrett,2020-03-24 The divine inspiration of Scripture may be confidently affirmed from Paul s epistles However it is hard to find such an explicit approach from Jesus and the Gospels In this NSBT volume Matthew Barrett argues that Jesus and the apostles have just as convictional a doctrine of Scripture as Paul or Peter but it will only be discovered if the Gospels are read within their own canonical horizon and covenantal context **Everything I Need to Know About Teaching . . . Language Development In Exceptional Circumstances Dorothy Bishop, K. Mogford, 2013-04-15 Ever since attempts were made to describe and explain normal language development references to exceptional circumstances have been made Variations in the conditions under which language is acquired can be regarded as natural experiments which would not be feasible or ethical under normal circumstances This can throw light on such questions as What language input is necessary for the child to learn language What is the relationship between cognition and language How independent are different components of language function Are there critical periods for language development Can we specify necessary and sufficient conditions for language impairment This book covers a range of exceptional circumstances including extreme deprivation twinship visual and auditory impairments autism and focal brain damage Written in a jargon free style and including a glossary of linguistic and medical terminology the book assumes little specialist knowledge This text is suitable for both students and practitioners in the fields of psycholinguistics developmental and educational psychology speech pathology paediatrics and special education
