The Public Economy in Crisis June A. Sekera, 2016-07-04 This Brief proposes a new theory of public economics which deemphasizes reliance on the free market and affirms the importance of public goods and services within the context of the democratic process and constitutional governance Public non market production makes up from a quarter to more than half of all economic activity in advanced democratic nation states Yet by imposing market precepts on the public domain as mainstream economics political science and public administration do public governing capacity is weakened and the democratic system suffers Agencies originally created to meet public needs are being warped into entities whose purpose is to generate revenue and in some cases deliver private profits at public expense

Drawing on classic public finance literature this book illustrates the differences between public economy and the market model and why those differences matter Building on this the Brief sketches the elements of a new theory of the public non market and illuminates its connections to the delegation of power and collective provision of resources from the polity This book will be useful to scholars of public economics political science and public administration as well as policy makers and those working in the public sector

Daylighting Design Mohamed Boubekri,2014-09-25 For thousands of years people have aligned their homes with the sun This tendency decreased with the availability of artificial light Yet due to the health effects of artificial light as well as rising energy costs the issue of designing with daylight is of great importance again today The primary objective of daylight systems is to make maximum use of daylight for certain building types and climates The book documents the various dimensions of the optimum use of daylight with particular reference to window orientation light distribution and prism technology and discusses the health and economic related aspects In the final chapter existing design concepts are documented in detail including the expansion of the Art Institute of Chicago Museum in the United States by Renzo Piano Building Workshop Terminal 3 of the Changi Airport in Singapore by Skidmore Owings Merrill and the Clever House in Germany by Behnisch Architekten QST ,1968
