

General Introduction to Engineering Mechanics

1. Statics:

It is the branch which deals with the forces and their effects on an object or a body at rest.

- For example, if we have an object or a body at rest and we deal with the forces and their effects that are acting on the body then we are dealing with static branch of engineering mechanics.

2. Dynamics:

It is the branch which deals with the forces and their effects on the bodies which are in motion.

- For example, if we have a body that is moving and we are dealing with the forces and their effects on the moving body then we are dealing with dynamics branch.
