

Hospital Antifungal Market Guide

Arlington Medical Resources' (AMR's) Hospital Antifungal Market Guide is the largest, most comprehensive and detailed syndicated audit monitoring clinical systemic antifungal usage in acute care hospitals.

The audit is the industry standard for monitoring patient shares, costs, infectious disease prevalence and most importantly, hospital clinical use of systemic antifungals. In addition, the audit presents fact-based clinical detail about the patients who received systemic antifungal(s) during hospitalization and chronologically characterizes the sequence of events they went through. The data is abstracted directly from patient care records by health care professionals instead of being based on ICD-9 CM codes or hospital billing records.

Geographic coverage includes France, Germany, Italy, Spain, United Kingdom and the United States. The United States edition of the audit is published twice a year and the European editions are published once a year. The audit is comprised of clinical patient data consisting of a random sample of actual clinical profiles of patients who received systemic antifungal(s) during their hospitalization.

Data elements include:

- Drug, form, strength, dosing, route
- Patient demographics (age, sex and co-morbidity)
- Diagnosis/surgical procedure
- Specialty of the physician prescribing the drug
- Consult with infectious disease specialist
