Trials Without Truth William T. Pizzi, 2000-06 Uncovers a major deficiency of U S criminal justice a trial system that prioritizes winning over truth Reginald Denny O J Simpson Colin Ferguson Louise Woodward all names that have cast a spotlight on the deficiencies of the American system of criminal justice Yet in the wake of each trial that exposes shocking behavior by trial participants or results in counterintuitive rulings often with perverse results the American public is reassured by the trial bar that the case is not typical and that our trial system remains the best in the world William T Pizzi here argues that what the public perceives is in fact exactly what the United States has a trial system that places far too much emphasis on winning and not nearly enough on truth one in which the abilities of a lawyer or the composition of a jury may be far more important to the outcome of a case than any evidence How has a system on which Americans have lavished enormous amounts of energy time and money been allowed to degenerate into one so profoundly flawed Acting as an informal tour guide and bringing to bear his experiences as both insider and outsider prosecutor and academic Pizzi here exposes the structural faultlines of our trial system and its paralyzing obsession with procedure specifically the ways in which lawyers are permitted to dominate trials the system s preference for weak judges and the absurdities of plea bargaining By comparing and contrasting the U S system with that of a host of other countries Trials Without Truth provides a clear headed wide ranging critique of what ails the criminal justice system and a prescription for how it can be fixed      **Marketing Manipulation: A Consumer's Survival Manual** Michael Kamins, 2018-07-31 Marketing Manipulation deals with the tactics and strategies used by marketers that prey on human cognitive social and memory based biases ultimately influencing consumer behavior in their favor Kamins focuses on examples from academic research where consumers have been found to be susceptible to bias and therefore have made less than optimal purchase decisions Particularly academic research in the area of Pricing Product Promotion Sales and marketing research Written in an accessible manner this book puts the

consumer you in the center and aims to help making all of us a better decision maker when confronted with a range of stimuli in a marketing environment
