Alcohol Use Disorders

Revised: May 2022

Reviewed: Dr. Terry Correll (Chief of Aerospace Psychiatric Consultation), Dr. Max Lee (Waiver Guide Coordinator), and Maj Paul Vu (AFMRA Medical Standards Policy Chief)

Significant Changes: Updates to aeromedical concerns and potential earlier waiver timelines for flyer/operators successfully engaged in (formerly completed) treatment with associated highly reliable surveillance

I. Waiver Consideration

Alcohol Use Disorders (AUD), whether mild, moderate, or severe, are disqualifying for all classes of flying and special duty in the Department of the Air Force. Only based on a tally of the established criteria, the severity designation does not necessarily correlate with prognosis or course of illness. Consequently, a "mild" AUD may have a worse prognosis/outcome than a "severe" AUD. These disorders have a very high rate of relapse and aeromedical dispositions should be made with great care. Close surveillance is required secondary to high relapse rates. Because of the significant risk of relapse, AUD waivers should be considered yearly to promote close observation for trained assets. Waiver should not exceed a period greater than three years. An "indefinite waiver" or "waiver retirement" is not recommended. Because of the very high number of cases, the majority of aviator waiver recommendations for alcohol-related diagnoses are managed through base and command level interaction. Aeromedical Consultation Service (ACS) review and in-person evaluation is not required, but is available for consultation for 3 complicated cases at the discretion of the waiver authority.

Table 1: Waiver potential for Alcohol Use Disorders.

Flying Class (FC)	Waiver Potential ¹	Waiver Authority ²	ACS Review or Evaluation
I/A	Maybe ³	AMWD	Maybe ⁴
All Other Untrained Assets	Maybe ³	DAFMAN 48-123 Attachment 2	Maybe ⁴
MSD Section W AFSCs	Yes	MAJCOM	Maybe ⁴
Non MSD Section W AFSCs	Yes	MAJCOM	Maybe ⁴

1. All aviators with a history of alcohol use disorders must remain 100% abstinent, provide documentation of successful treatment and after-care follow-up, and must not take any medications for substance misuse.

2. If there are medical complications from substance use disorders (bleeding varices, cirrhosis, hallucinosis, etc.), then an IRILQ is required IAW DoDI 6130.03 vol 2.

3. There is no formal waiver provision for FC I/A, initial FC II, and other Untrained Assets. The waiver authority considers waivers on a case-by-case basis.

4. ACS review/consultation is at the discretion of the waiver authority.

In order to be considered for waiver, three conditions must be met:

- 1) the individual must have successfully engaged in (formerly completed) treatment (defined below) as determined and documented by the MTF Alcohol & Drug Abuse Prevention & Treatment (ADAPT) program treatment team.
