Internet Marketing Success B. Vincent,2024-12-10 In recent years the word internet marketing has come to refer to a broad range of topics For many it means exactly what it says internet marketing in which case it is considered synonymous with digital marketing and online marketing For others it has become synonymous with affiliate marketing information products and the making money online sector For our purposes we will err on the side of the former and adopt the following definition Internet marketing is the process of generating leads sales or brand awareness through the utilization of internet properties and traffic Typically this is accomplished through search engine optimization social media marketing email marketing and various forms of paid advertising One of the most effective methods to begin learning internet marketing is to break it down into the numerous objectives that a firm may pursue with it Of course the ultimate purpose of marketing is income With that in mind we may categorize sales as a main objective of internet marketing and many firms do focus on driving people directly to paid offers whether they are digital product sales pages or physical product pages within an eCommerce store However sales remain a distant long term goal for many organizations However a more prevalent immediate or short term objective of internet marketing is lead generation By collecting leads on the internet rather than making individual sales a business can then use its lead list to market to potential customers for free or close to free in the future with the expectation that multiple future sales will increase the average lifetime value of each lead and result in a higher long term ROI on each dollar spent on marketing For an online firm lead generation may be as simple as developing an email list possibly with customer names attached Lead generation for an eCommerce firm or a local offline business may also contain actual postal addresses and phone numbers so that they can follow up via telemarketing or by mailing catalogues and special offers Other organizations may seek even more robust lead data such as business information such as industry classifications or employee count in B2B marketing or income ranges and family size in higher ticket B2C models such as insurance or real estate Due to the fact that lead creation is frequently viewed as the most prevalent and multifaceted immediate aim of internet marketing the full of chapter three will be devoted to the many methods and forms of lead development
