After Method Mess In Social Science Research:

After Method John Law, 2004 John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision. It is usually said that only poor research produces messy findings and the idea that things in the world might be fluid, elusive or multiple is unthinkable. Law's startling argument is that this is wrong and it is time for a new approach. Many realities, he says, are vague and ephemeral. If methods want to know and help to shape the world, then they need to reinvent themselves and their politics to deal with mess. That is the challenge. Nothing less will do.

After Method John Law, 2004 *Search After Method* Julie Laplante, Ari Gandsman, Willow Scobie, 2020-09-11 Reigniting a tradition of learning from experience *Search After Method* is a plea for livelier forms of anthropology. The anthropologists in the collection recount their experiences of working in the field framed within a range of anthropological debates. The book thus provides accounts of lived experiences from both extensive and contemporary fieldwork as well as offering solutions for how to evolve the art of anthropological research beyond what is currently imagined.

Governing the Feminist Peace Paul C. Kirby, Laura Shepherd, 2024-04-02 The Women Peace and Security (WPS) agenda is celebrated as a landmark global framework for achieving gender equality in peace and security governance. Its power is visible in two decades of United Nations resolutions, national action plans, regional initiatives and countless activist, academic and philanthropic projects. Yet despite this vitality, it is haunted by failure as a lack of political will and stubborn patriarchal resistance frustrate its promise. This book offers a groundbreaking critical account of the WPS agenda, exploring its evolution in relation to the wider politics of global governance and feminism. Paul Kirby and Laura J. Shepherd argue that WPS is not a settled, cohesive policy but a field in flux, defined and disrupted by a growing number of national, supranational, subnational and transnational agents who in turn act on an expanding catalogue of threats from climate change to homophobia, challenging traditional boundaries of peace and security. Kirby and Shepherd reconceptualize WPS as a policy ecosystem, tracing interaction and contestation around the agenda across levels from the UN Security Council to military alliances to feminist activists. They combine analysis of a vast dataset of policy documents with key informant interviews and close readings of diplomacy, statecraft, the politics of indigeneity, counterinsurgency, antimilitarism, human rights and the arms trade across the first twenty years of WPS. Far reaching and incisive, *Governing the Feminist Peace* poses a provocative question: What if we abandoned the idea of the WPS agenda as a unified political project altogether?

Activist and Socially Critical School and Community Renewal John Smyth, Lawrence Angus, Barry Down, Peter McInerney, 2019-02-11 *Activist and Socially Critical School and Community Renewal* comes about at an incredibly important point in history and it offers a genuinely new paradigm. This book attempts what few others have tried to bring together: knowledge and literature around school reform and community renewal through authentic ethnographic stories of real

schools and communities The book describes and analyzes a courageous struggle for a more socially just world around notions of relational solidarity that speak back to ideas that continue to privilege the already advantaged This book provides some desperately needed new storylines as a basis for school and community renewal for the most excluded groups in society It provides a new social imagination for doing school in contexts that stand to benefit from school and community voiced approaches

The SAGE Handbook of Case-Based Methods David Byrne, Charles C Ragin, 2009-06-18 Case based methods have a long history in the social sciences They are extensively used and raise many practical and theoretical questions This book provides a comprehensive critical examination of case oriented research It offers concrete proposals about the best research methods and provides an unparalleled guide to the emergence and complexity of the field The Handbook Situates the reader in the essential theoretical and practical issues Demonstrates the unity and diversity of case oriented research through an examination of case based methods Distinguishes between case based and case study research Elucidates the philosophical issues around case based methods Examines case based work in the context of both social theory and theories of research methods

SAGE Secondary Data Analysis John Goodwin, 2012-07-23 One central and enduring image of the social science researcher is of an individual who commits a great deal of time to collecting original primary data from a field of enquiry. This approach is often underpinned by a sincerely held belief that key research questions can only be explored by the collection of ever new and ever greater amounts of data or that already existing data are insufficient for researchers to test their ideas. Yet such an approach to social science research can be problematic not least because the collection of primary data can be an expensive time consuming and even wasteful approach to social enquiry. Secondary analysis can serve many purposes as well as being a valid approach in its own right. However despite its widespread application secondary analysis is often undervalued or perceived to be the preserve of only those interested in the re use of large scale survey data. Highlighting both the theory and practice of secondary analysis and the use of secondary sources this collection considers the nature of secondary analysis as a research tool reflects on the definitional debates surrounding terms such as secondary analysis data re use and restudies illustrates how secondary analysis is used in social science research and finally reviews the practical methodological and ethical aspects of secondary analysis. Volume One Using Secondary Sources and Secondary Analysis Volume Two Quantitative Approaches to Secondary Analysis Volume Three Qualitative Data and Research in Secondary Analysis Volume Four Ethical Methodological and Practical Issues in Secondary Analysis Life After Leaving Sophie Tamas, 2016-06-16 Both personal and theoretical autoethnographic and analytical this book offers a performative arts based narrative about the aftermath of abusive marriages using the stories drawings songs of other women to compare with Tamas's own lived experience *Imagining Regulation Differently* Janet Newman, Morag McDermont, Tim Cole, Angela Piccini, 2020-01-29 There is an urgent need to rethink relationships between systems of government and those who are governed. This book explores ways of rethinking those relationships by bringing communities normally excluded from decision making to centre stage to experiment with new methods of regulating for engagement. Using original co produced research it innovatively shows how we can better use a bottom up approach to design regulatory regimes that recognise the capabilities of communities at the margins and powerfully support the knowledge passions and creativity of citizens. The authors provide essential guidance for all those working on co produced research to make impactful change **Handbook of Democratic Innovation and Governance** Stephen Elstub, Oliver Escobar, 2019-12-27 Democratic innovations are proliferating in politics governance policy and public administration. These new processes of public participation are reimagining the relationship between citizens and institutions. This Handbook advances understanding of democratic innovations in theory and practice by critically reviewing their importance throughout the world. The overarching themes are a focus on citizens and their relationship to these innovations and the resulting effects on political equality. The Handbook therefore offers a definitive overview of existing research on democratic innovations while also setting the agenda for future research and practice Criminal Justice and The Ideal Defendant in the Making of Remorse and Responsibility Stewart

Field,Cyrus Tata,2023-05-18 This book investigates how defendants are assessed by criminal justice decisionmakers such as judges lawyers probation officers parole board members and those involved in restorative justice What attitudes and emotions are defendants expected to show How are these expectations communicated The book argues that defendants at various stages of the criminal justice process are expected to show a more or less free acceptance of guilt and individual responsibility along with a display of appropriate emotions ideally including genuine remorse It examines why such expressions of individual responsibility and remorse are so important to decision makers and the state With contributors from across the world the book opens new comparative possibilities and research agendas

The Routledge Handbook of Methodologies in Human Geography Sarah A. Lovell,Stephanie E. Coen,Mark W. Qualitative Diary Methods Laura Radcliffe,Leighann Spencer,2025-04-29 Qualitative diary methods QDMs are a versatile range of multi modal data collection methods that involve participants recording events and experiences and emotions and reflections as they happen on multiple occasions and over a particular time period These data collection methods include a pen and paper diary as well as other electronic modes of diary keeping including text but also audio photo video and app based diaries that allow for a range of modalities This book covers the diversity of QDM options available to researchers providing a clear rationale as to when and why different

qualitative diary methods could be used The authors consider research design and ethical considerations for each of the distinct QDM approaches and provide end of chapter checklists and activities to help readers apply the methods to their own research

Affected Rick Iedema, 2020-11-30 This book's main message is to advocate for a collaborative affective visualised and future oriented research agenda The book finds its inspiration in the chasm that separates philosophising about being shattered and thinking that is shattered Heidegger 1946 Letter on Humanism To explore this chasm the book journeys through a range of psychological and posthuman perspectives on affect and becoming The aim of this journey is to reconcile shattered thinking feeling with Spinoza's ethics according to which our capacity to be affected determines our capacity to act The book elaborates this capacity to become in terms of our uniquely human propensity to experiment with counter intuitive inversions in this case to call to account that which is affected rather than that which affects The book will appeal to students and academics working in the fields of alternative research methods the social sciences and organisation studies
