The Meritocracy Trap Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American

people     Fuzzy Techniques for Decision Making 2018 José Carlos R. Alcantud, 2020-12-02 Zadeh's fuzzy set theory incorporates the impreciseness of data and evaluations by imputting the degrees by which each object belongs to a set. Its success fostered theories that codify the subjectivity, uncertainty, imprecision, or roughness of the evaluations. Their rationale is to produce new flexible methodologies in order to model a variety of concrete decision problems more realistically. This Special Issue garners contributions addressing novel tools, techniques, and methodologies for decision making inclusive of both individual and group, single or multi-criteria decision making in the context of these theories. It contains 38 research articles that contribute to a variety of setups that combine fuzziness, hesitancy, roughness, covering sets, and linguistic approaches. Their ranges vary from fundamental or technical to applied approaches.     **Commerce Publications Update**

**Regional Innovation Strategies 3 (RIS3)** Roberta Capello, Henning Kroll, 2018-12-07 With regions and nations having formally fulfilled the ex ante conditionality this book provides a first overall review of RIS3 policy processes aiming to assess the consistency of the concept of smart specialization from an applied policy oriented perspective Moving from the theory of design to the practice of implementation the reflections and case studies in this volume reveal strengths and weaknesses in the way concrete strategies have been conceived and implemented enabling reflections on the future of the concept in a more general sense In many cases smart specialization strategies turn out to be new variants of regional development policies embracing the importance of a place based approach However the approach s potential to add distinctive value will stem from its capacity to turn innovation and knowledge into tools for local development by harnessing them for wider territorial development goals By helping regions to identify and leverage untapped resources through new processes smart specialization based policies may help to reconcile cohesion and competitiveness objective Consequently new approaches appear most promising where institutional administrative and political conditions allow the setup of genuinely new processes and where their focus is on territorial assets in a comprehensive manner rather than mere industrial renewal This book was originally published as a special issue of European Planning Studies
