

WARNING

Do not attempt to remove the bulb when it is hot. Severe burns may result.

To replace the headlight bulb, use the following procedure.

1. Remove the wiring harness connector from the back of the headlight.
2. Grasp the bulb socket, turn it counterclockwise and remove, and pull the bulb straight out of the socket.
3. Install the new bulb into the socket and rotate it completely clockwise in the housing.
4. Install the wiring harness connector.

TAILLIGHT-BRAKELIGHT

To replace the taillight-brakelight bulb, use the following procedure.

1. Remove the two machine screws and remove the light assembly.
2. Rotate the bulb socket counterclockwise to remove it from the light assembly; then pull straight out on the bulb. Push the new bulb straight into the socket.
3. Install the bulb and socket into the light assembly and turn clockwise to lock in place.
4. Install the taillight-brakelight assembly on the canopy support.

CHECKING/ADJUSTING HEADLIGHT AIM

The headlights can be adjusted vertically. The geometric center of the HIGH beam light zone is to be used for vertical aiming.

1. Position the vehicle on a level floor so the headlights are approximately 6.1 m (20 ft) from an aiming surface (wall or similar aiming surface).

NOTE: There should be an average operating load on the vehicle when adjusting the headlight aim.

2. Measure the distance from the floor to the mid-point of each headlight.
3. Using the measurements obtained in step 2, make horizontal marks on the aiming surface.
4. Make vertical marks which intersect the horizontal marks on the aiming surface directly in front of the headlights.
5. Switch on the lights. Make sure the HIGH beam is on. **DO NOT USE LOW BEAM.**

6. Observe each headlight beam aim. Proper aim is when the most intense beam is centered on the vertical mark 5 cm (2 in.) below the horizontal mark on the aiming surface.

7. Using the adjuster knob, adjust each headlight until correct aim is obtained.

Shift Lever

CHECKING SHIFT CABLE

Set the parking brake and turn the ignition switch on; then with the shift lever in the neutral position, look for the (N) indication on the LCD. Shift into high range and look for the (H) indication, low range for the (L) indication, and reverse for the (R) indication. Shift the transmission into neutral and turn the ignition switch off.
