Electric and Hybrid Vehicles Gianfranco

Pistoia,2010-07-27 Electric and Hybrid Vehicles Power Sources Models Sustainability Infrastructure and the Market reviews the performance cost safety and sustainability of battery systems for hybrid electric vehicles HEVs and electric vehicles EVs including nickel metal hydride batteries and Li ion batteries Throughout this book especially in the first chapters alternative vehicles with different power trains are compared in terms of lifetime cost fuel consumption and environmental impact The emissions of greenhouse gases are particularly dealt with The improvement of the battery or fuel cell performance and governmental incentives will play a fundamental role in determining how far and how substantial alternative vehicles will penetrate into the market An adequate recharging infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells as it may contribute to overcome the so called range anxiety Thus proposed battery charging techniques are summarized and hydrogen refueling stations are described The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers Contributions from the worlds leading industry and research experts Executive summaries of specific case studies Information on basic research and application approaches

Local Action Tommy Linstroth,Ryan Bell,2007 While traditionally framed as a national and international problem climate change is also an important local issue For the past fifteen years while nations have fought over the terms of emissions reductions and the Kyoto Protocol local governments and communities have been enacting innovative measures that not only prevent emissions of significant quantities of greenhouse gases but also reduce air pollution save money and improve the overall quality of life In the absence of a serious national policy that addresses global warming these grassroots efforts can and have made a difference Since 1993 when fourteen pioneering local governments first began to develop programs to reduce greenhouse gas emissions a national and international movement has formed to fight global climate change through concerted local action These communities are having a significant effect A handful of jurisdictions in the United States are preventing over twenty million tons of CO₂ from entering the atmosphere annually and have saved over four hundred million dollars in the process These initiatives include greening the local building codes creating commercial waste reduction programs encouraging water conservation promoting bicycling and fuel efficient vehicles upgrading city buildings advocating for the use of biodiesel for municipal transportation and designing innovative systems and policies for reduced paper use Two in depth case studies Fort Collins Colorado and Portland Oregon demonstrate how two cities have created and implemented climate friendly and environmentally sound habitats While most books on global warming focus on national and international implications and policy approaches or serve as guides to help individuals live in an ecologically sound manner Linstroth and Bell provide a blueprint for local governments to follow Combining an analysis of existing federal policy with examples of successful local policy they provide practical examples of measures that can be implemented by communities and local governments across the United States
