

Do not drive the vehicle without the seat head restraints. Head restraints are intended to help reduce injuries during an accident.

**!** To avoid damage to the seats and the seat heating, observe the following information:

- do not spill any liquids on the seats. If liquid is spilled on the seats, dry them as soon as possible.
- if the seat covers are damp or wet, do not switch on the seat heating. The seat heating should also not be used to dry the seats.

- clean the seat covers as recommended, see the "Interior care" section.

- do not transport heavy loads on the seats. Do not place sharp objects on the seat cushions, e.g. knives, nails or tools. The seats should only be occupied by passengers, if possible.

- when the seat heating is in operation, do not cover the seats with insulating materials, e.g. covers, bags, seat covers, child seats or booster seats.

**!** When you leave the seats, make sure that there are no objects in the footwell or behind the seats. Otherwise, you could damage the seats and the objects.

**!** The head restraints in the front seats are installed with the NECK-PRO system (→ page 52). For this reason, it is not possible to remove the head restraints from the front seats.

Adjust the head restraint in such a way that it is as close to the head as possible and the center of the head restraint supports the back of the head at eye level. This will reduce the potential for injury to the head and neck in the event of an accident or similar situation.

With a rear seat occupied, make sure to move the respective head restraint up from the stowed non-use position and have the occupant adjust the head restraint properly.

Do not drive the vehicle without the seat head restraints installed when the rear seats are occupied. Head restraints are intended to help reduce injuries during an accident.

##### **Warning!**

Make sure the rear seat head restraints engage when placing them upright manually. Otherwise their protective function cannot be ensured.
