**Lemon-Aid Used Cars and Trucks 2012-2013** Phil Edmonston, 2012-05-19 Lemon Aid guides steer the confused and anxious buyer through the economic meltdown, unlike any other car and truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon Aid Used Cars and Trucks 2012-2013 has the answers, including more vehicles rated with some redesigned models that don't perform as well as previous iterations, downrated more roof crash worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix, as well as an updated list of the best and worst beaters on the market. More secret warranties taken from automaker internal service bulletins and memos than ever.

**Mustang Boss 302** Donald Farr, 2011-08-29 Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission of the standard Mustang's fake rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0-liter powerplant in the Mustang GT for 2011.
