1113 Cambridge Sp 2015 Paper:

Democratization and Autocratization in Comparative Perspective Jørgen Møller, Svend-Erik Skaaning, 2023-12-22 This book provides balanced critical and comprehensive coverage of the theories and realities of autocratization and democratization. It sketches developments in the conceptions of democracy, discusses how to distinguish between different forms of political rule, and maps the development of democracy and autocracy across space and time. The book reviews the major debates and findings about domestic and international causes and consequences of democratization and autocratization. It synthesizes theoretical models and empirical relationships based on an explicit comparative perspective which focuses on similarities and differences across countries and historical periods. Key features: Offers a coherent framework which students and scholars can use to grasp the literature on democratization and autocratization as a whole. Includes tables and figures as well as plentiful illustrative in-text features including chapter summaries, text boxes, concluding bullet points, and discussion questions. Fully updated to account for the recent developments within the relevant academic literature as well as global and regional patterns of democratization and autocratization. A section on democracy and autocracy today highlighting important political challenges for democracy such as populism and polarization and providing an overview of the level of democratic crisis in developed democracies. *Democratization and Autocratization in Comparative Perspective* will be essential reading for students and scholars of political science, democracy and democratization, comparative politics, political theory, and international relations.

The Nature and Models of Metamorphism Vladimir V. Reverdatto, Igor I. Likhanov, Oleg P. Polyansky, Valentin S. Sheplev, Vasilii Yu. Kolobov, 2018-12-31 This book presents the genetic connections of metamorphism and geodynamics. It discusses the tectonic and magmatic processes as the reason of metamorphism and the geological types of metamorphism which define the features of parameters and t paths. Three categories of metamorphism are distinguished depending on the heat flow rate: 1 at a geothermal gradient near to an average terrestrial normal value; 2 at a heightened thermal gradient as the result of additional heat supply in the earth's crust by magmatic intrusions and diapirism of magma; 3 at a reduced thermal gradient during the collision of lithosphere plates and blocks of the earth's crust. The quantitative methods of description of metamorphism have been widely used in this book. The mathematical models of metamorphism have been studied in connection with magmatic intrusions, rifting process, and magmatic diapirism. Mineral changes in the rocks controlled by variations of parameters, mass transfer, and chemical reactions have also been characterized. The book proposes a quasi-stationary model of diffusion metasomatism with respect to the formation of zonal structures of minerals. The method of mineral thermobarometry for the conditions of unsteady equilibrium has been worked out. The quantitative analysis of mass transfer during metamorphic reactions in the rock matrix has been carried out, and the mobility of chemical elements at metamorphism has been estimated as well. The book is intended for specialists in the fields of petrology, mineralogy, and geochemistry and for students at the senior and graduate

level **The Political Economy of the Eurozone in Central and Eastern Europe** Krisztina Arató,Boglarka Koller,Anita Pelle,2021-06-30 The idea for this volume came from the enigma that some Central and Eastern European CEE European Union EU member states have been keen to join the Eurozone while others have shown persistent reluctance Moreover the attitudes towards joining have seemingly not correlated with either the level of economic development or the time spent as part of the EU nor with any other rational reason such as the level of integration into the EU real economy or the level of trust in the EU on the part of the public Therefore at first sight the answer to the question why in why out remains rather unclear The attractiveness of the currency union has nevertheless not disappeared for the CEE countries Despite the Eurozone crisis of 2010 13 it was during that time that the Baltic states introduced the euro Then after a few years of inactivity Croatia and Bulgaria successfully applied for membership of the exchange rate mechanism in July 2020 amid the economic crisis caused by the coronavirus COVID 19 pandemic At the same time the three Visegrad countries still using their national currencies Poland Czechia and Hungary no longer have a target date to join the monetary union This volume aims to discuss these issues from horizontal aspects and through country studies with contributions from expert authors from or closely related to the CEE region **Geomechanics and Geodynamics of Rock Masses** Vladimir Litvinenko,2018-05-24 Geomechanics and Geodynamics of Rock Masses Selected Papers contains selected contributions from EUROCK 2018 the 2018 International Symposium of the International Society for Rock Mechanics ISRM 2018 Saint Petersburg Russia 22 26 May 2018 Dedicated to recent advances and achievements in the fields of geomechanics and geotechnology the book will be of interest to researchers and professionals involved in the various branches of rock mechanics and rock engineering EUROCK 2018 organized by the Saint Petersburg Mining University is a continuation of the successful series of ISRM symposia in Europe which began in 1992 in Chester UK Extreme Floods and Droughts under Future Climate Scenarios Momcilo Markus,Ximing Cai,Ryan Sriver,2019-11-28 Hydroclimatic extremes such as floods and droughts affect aspects of our lives and the environment including energy hydropower agriculture transportation urban life and human health and safety Climate studies indicate that the risk of increased flooding and or more severe droughts will be higher in the future than today causing increased fatalities environmental degradation and economic losses Using a suite of innovative approaches this book quantifies the changes in projected hydroclimatic extremes and illustrates their impacts in several locations in North America Asia and Europe Encyclopedia of Geology ,2020-12-16 Encyclopedia of Geology Second Edition presents in six volumes state of the art reviews on the various aspects of geologic research all of which have moved on considerably since the writing of the first edition New areas of discussion include extinctions origins of life plate tectonics and its influence on faunal provinces new types of mineral and hydrocarbon deposits new methods of dating rocks and geological processes Users will find this to be a fundamental resource for teachers and students of geology as well as researchers and non geology professionals seeking up to date reviews of geologic research Provides a comprehensive and

accessible one stop shop for information on the subject of geology explaining methodologies and technical jargon used in the field Highlights connections between geology and other physical and biological sciences tackling research problems that span multiple fields Fills a critical gap of information in a field that has seen significant progress in past years Presents an ideal reference for a wide range of scientists in earth and environmental areas of study

Links Between Growth, Inequality, and Poverty: A Survey Ms. Valerie Cerra, Mr. Ruy Lama, Norman Loayza, 2021-03-12 Is there a tradeoff between raising growth and reducing inequality and poverty This paper reviews the theoretical and empirical literature on the complex links between growth inequality and poverty with causation going in both directions The evidence suggests that growth can be effective in reducing poverty but its impact on inequality is ambiguous and depends on the underlying sources of growth The impact of poverty and inequality on growth is likewise ambiguous as several channels mediate the relationship But most plausible mechanisms suggest that poverty and inequality reduce growth at least in the long run Policies play a role in shaping these relationships and those designed to improve equality of opportunity can simultaneously improve inclusiveness and growth

The Routledge Handbook of Autocratization Aurel Croissant, Luca Tomini, 2024-05-14 The Routledge Handbook of Autocratization comprehensively and systematically explores the current understanding and uncharted research paths of autocratization With wide reaching regional coverage and expert analysis from Asia North and South America Europa the Middle East and North Africa this handbook reveals cross country and cross regional analysis and insights and presents in depth explanations and consequences of autocratization Arranged in five thematic parts chapters explore the basic aspects of conceptualization theorization and measurement of autocratization the role of various political and non political actors as perpetrators supporters bystanders or defenders of democracy against autocratization processes and the consequences across various policy fields Showcasing cutting edge research developments the handbook illustrates the deeply complex nature of the field examining important topics in need of renewed consideration at a time of growing concerns for democracy and the global spread of authoritarian challenges to democracy The Routledge Handbook of Autocratization will be a key reference for those interested in and studying authoritarianism democratization human rights governance democracy and more broadly comparative politics and regional area studies Chapter 2 and Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 International license chapter 2 and Creative Commons Attribution CC BY 4.0 International license Chapter 11

Integrated Fault Seal Analysis S. Ogilvie, S. Dee, R.W. Wilson, W. Bailey, 2020-08-03 Faults commonly trap fluids such as hydrocarbons and water and therefore are of economic significance During hydrocarbon field development smaller faults can provide baffles and or conduits to flow There are relatively simple well established workflows to carry out a fault seal analysis for siliciclastic rocks based primarily on clay content There are however outstanding challenges related to other rock types to calibrating fault seal models with static and dynamic data and

to handling uncertainty The variety of studies presented here demonstrate the types of data required and workflows followed in today s environment in order to understand the uncertainties risks and upsides associated with fault related fluid flow These studies span all parts of the hydrocarbon value chain from exploration to production but are also of relevance for other industries such as radioactive waste and CO2 containment **Handbook of the Economics of Marketing** ,2019-09-21

Handbook of the Economics of Marketing Volume One Marketing and Economics mixes empirical work in industrial organization with quantitative marketing tools presenting tactics that help researchers tackle problems with a balance of intuition and skepticism It offers critical perspectives on theoretical work within economics delivering a comprehensive critical up to date and accessible review of the field that has always been missing This literature summary of research at the intersection of economics and marketing is written by and for economists and the book s authors share a belief in analytical and integrated approaches to marketing emphasizing data driven result oriented pragmatic strategies Decolonizing Civil Society in Mozambique Tanja Kleibl,2021-08-26 By demonstrating that Western conceptions of civil society have provided the framework for interpreting societies in the Global South Decolonizing Civil Society in Mozambique argues that it is only through a critical deconstruction of these concepts that we can start to re balance global power relationships both in academic discourse and in development practices Examining the exclusionary discourses framing the support for Western type NGOs in the development discourse often to the exclusion of local social actors this book dissects mainstream contemporary ideas about civil society and finds a new means by which to identify local forms of social action often based in traditional structures and spiritual discourses Outlining new conceptual ideas for an alternative framing of Mozambique s civil society Kleibl proposes a series of fresh theoretical issues and questions alongside empirical research moving towards a series of new policy and practice arguments for rethinking and decolonizing civil society in the Global South Handbook on Migration and Welfare Crepaz, Markus M.L.,2022-01-14 Bringing together prominent scholars in the field this Handbook provides an interdisciplinary exploration of the complex interrelationship between migration and welfare Chapters further examine the effects of emigration on sending societies exploring issues such as the impact of remittances diasporas and skill deterioration as a result of human capital flight on capacity building and on economic and political development more generally The Handbook of Peer Production Mathieu O'Neil,Christian Pentzold,Sophie Toupin,2021-01-20 The definitive reference work with comprehensive analysis and review of peer production Peer production is no longer the sole domain of small groups of technical or academic elites The internet has enabled millions of people to collectively produce revise and distribute everything from computer operating systems and applications to encyclopedia articles and film and television databases Today peer production has branched out to include wireless networks online currencies biohacking and peer to peer urbanism amongst others The Handbook of Peer Production outlines central concepts examines current and emerging areas of application and analyzes the forms and principles of cooperation that continue to impact multiple areas of

Impact of Climate Change on the Human Living Environment Zengyu Hu,Yanfang Sang,Qiming Zhou,Zheng Duan, Climate change has been attracting extensive attention worldwide due to its significant and irreversible impacts on the human living environments including hydrometeorological disasters freshwater availability land use and land change urbanization food production disease outbreaks and many other aspects It has caused huge socio economic losses and is the utmost obstacle to the sustainable development of human society Therefore addressing the above problems is an urgent and necessary issue to explore the impacts of climate change on different aspects of the human living environment as an important basis to adopt effective adaptive measures and actions for mitigation of climate change impacts

Strategy, Power and CSR Santiago García-Álvarez,Connie Atristain-Suárez,2020-07-24 In today s global and complex environment traditional views towards organizational management are not enough for businesses to thrive It s only by bringing together different approaches can management styles develop fast enough to keep pace with the ever changing big picture

Afrotropical Streams and Rivers Tatenda Dalu, Frank Masese,2024-11-09 The Afrotropical Streams and Rivers Structure Ecological Processes and Management is a comprehensive guide that provides assessment of major rivers and tributaries in Africa Unlike other books available the editors present a thorough study of geomorphological hydrological biological and ecological processes incorporating a range of plant and animal communities while considering implications of human communities that depend upon them This book edited by a diverse cohort of researchers and or scholars is intended as an educational and practical guide for graduate students researchers and scientists who focus on the biodiversity conservation and management policy issues of the African river systems Provides a comprehensive introduction to African freshwater rivers their biota and abiotic

processes Contains unique case studies on African streams and rivers Organised around an interdisciplinary approach that covers the complex aspects of conservation and management of African river systems on the continent **Routledge Handbook of Autocratization in Southeast Asia** Netina Tan,Yuko Kasuya,2025-07-31 The Routledge Handbook of Autocratization in Southeast Asia examines how global and domestic forces of autocratization affect regional and local politics It analyzes how the interactions of international and domestic factors affect actors and institutions in both democracies and autocracies in the region Bringing together a representative slate of both local and international junior and senior scholars of different methodological backgrounds this Handbook cross examines regional trends and provides an insider view of the causes and effects of autocratization in a region with diverse experiences with de colonization state building and economic and political developments The 28 chapters are organized into three sections Part I examines a range of structural international socio political technological and ideological causal factors of autocratization Part II offers a comparative analysis of the consequences of autocratization on key actors and democratic institutions Part III provides a more detailed study of autocratic consolidation and pushback in each country in Southeast Asia Taking into account structural historical institutional and cultural factors the contributors analyze how domestic actors and democratic institutions withstand the global forces of autocratization This Handbook fills empirical gaps in the current scholarship by focusing on all nation states in the Association of Southeast Asia Nations and Timor Leste varied regime types with diverse socio religious backgrounds It is the first authoritative reference work dedicated to Southeast Asia s autocratization and will be an indispensable reference work for academics and policymakers interested in democracy and autocracy regime transition and Southeast Asian politics Consumer Theories of Harm Paolo Siciliani,Christine Riefa,Harriet Gamper,2019-09-19 It has long been thought that fairness in European Consumer Law would be achieved by relying on information as a remedy and expecting the average consumer to keep businesses in check by voting with their feet This monograph argues that the way consumer law operates today promises a lot but does not deliver enough It struggles to avoid harm being caused to consumers and it struggles to repair the harm after the event To achieve fairness solutions need to be found elsewhere Consumer Theories of Harm offers an alternative model to assess where and how consumer detriment may occur and solutions to prevent it It shows that a more confident use of economic theory will allow practitioners to demonstrate how a poor standard of professional diligence lies at the heart of consumer harm The book provides both theoretical and practical examples of how to combine existing law with economic theory to improve case outcomes The book shows how public enforcers can move beyond the dominant transparency paradigm to an approach where firms have a positive duty to treat consumers fairly and shape their commercial offers in a way that prevents consumers from making mistakes Over time this fairness by design approach will emerge as the only acceptable way to compete **Climate Change and Mango Production** Syed Atif Hasan Naqvi,Shakeel Ahmad,Mukhtar Ahmed,2025-07-26 The significance of the climate change and

their impacts on fruit crops their problems and their solutions determine the need for a book in agriculture So firstly we are going to talk about the importance of climate change and the shift of the climate due to various reasons Similarly king of fruits mango is also facing various issues due to climate change and the most important problems which are causing serious constraints to mango production are Mango sudden decline and mango malformation These problems have emerged in orchards since the issue of climate change is increasing day by day and currently there is no mango orchard free from these diseases and leading to very low production of the crop with respect to previous years Similarly climate change has also raised the issue of unseen pathogens in the mango orchards posing serious challenges to mango production due to new diseases and stresses The main drivers behind the writing of this book is that this book will disseminate a plethora of knowledge on how to deal smartly with the mango orchards in changing climate to obtain good yield and to maintain good health status
