- 3) **Disruption** (more individuals acquire peripheral character value at both ends of the distribution curve)

Original Seed eating bird located in one area of Galapagos Islands migrated to other habitat of island leading to evolution of different species k/a **adaptive radiations**

Examples of Adaptive radiations:

- + Darwin's finches,
- + Placental Mammals in Australia
- + Australian marsupials

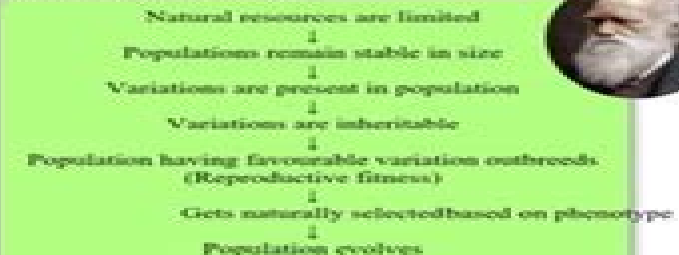

When more than one adaptive radiation appeared to have occurred in an isolated geographical area (representing different habitats), one can call this **convergent evolution**.
