

Inside the MERC 1000 and 850

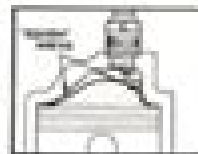

UNDER THE COWL . . . more dependable power, unmatched fuel economy! One-piece, die-cast aluminum engine block . . . fewer joint faces and gaskets to loosen and leak. Six-in-line, small-bore cylinders with Power-Dome combustion chambers and forged-aluminum pistons . . . more power, smoother idle, high performance, less wear. Forged alloy steel crankshaft and connecting rods with anti-friction bearings to tolerate sustained high-load operation. Short-stroke design for lower piston speeds, less wear and reduced vibration. Three fixed-jet carburetors give correct fuel-air mixture at all speeds. "Merconimizer" linkage for maximum fuel efficiency . . . gives up to 50 percent better fuel mileage when throttle is backed off to cruising speed. Weather-proof, twin-circuit, battery ignition system with manual and electric starting assures quick starting and safe dependability under all conditions. Three-drive alternator-type generator . . . no fire hazard, no radio interference, long life, minimum maintenance . . . keeps battery fully charged at all times. Internal reed valves actuated by crankcase pressure eliminate external manifold . . . uniform fuel distribution to all cylinders . . . automatically responsive to engine demand from slow troll to full throttle.

BETWEEN COWL & WATERLINE . . . there's extra safety for motor, boat, passengers! Forged aluminum clamp brackets are heat-treated to the strength of steel and are virtually unbreakable. "Dyna-Float" suspension isolates engine vibration from the boat. Hydraulic shock absorbers protect transom against impact. Safety-tilt switch shuts off engine when motor is tilted . . . turns it on again as propeller re-enters the water . . . prevents over-revving and resultant thrust surges. One-piece, die-cast aluminum drive-shaft housing for per-

manent alignment of bearings and shafts . . . not dependent on holding power of studs, bolts, nuts and miscellaneous parts.

UNDER THE WATERLINE . . . worry-free lower units, positive propeller protection! One-piece, die-cast aluminum lower-unit housing . . . streamlined to glide over obstacles and through weeds, reduces underwater drag, tolerates high impact. Heavy-duty power train with large gears, bearings, shafts and shifter clutches, for longer life with less maintenance. Full gearshift with forward, running neutral, reverse. Tilt lock automatically engages to prevent propeller from being tilted out of water while running in neutral or during reverse operation . . . added safety. Shear-proof, multiple-spline propeller drive and compressed line-rubber safety clutch eliminate shear pins or "drive pins." Adjustable trim-tab and water pickup roots with propeller slip stream to neutralize steering side pull . . . gives effortless steering, straight ahead or in turns . . . efficient, non-clogging. Variable-volume water pump responds automatically to engine cooling needs. Quickster custom-designed propeller with Jet-Prop exhaust through the hub reduces lower unit drag and exhaust noise . . . reduced back pressure lets engine "breathe" more freely.

MERCURY POWER DOME combustion chambers on all 6-cylinder models increase fuel efficiency by "squinting" the fuel-air charge in the combustion chamber . . . slowing the burning of the fuel to cause more complete and uniform combustion within the chamber. The motor operates more quietly, responds quicker, idles smoother; deposits are minimized.
