

TURN INDICATOR LIGHTS

The turn indicator lever is located at the left side of the steering column. Moving the lever up signals a right turn; down, signals a left turn. In each position, the corresponding front and rear turn signal lights flash on and off. When a turn is completed, the lever automatically returns to its neutral or off position. However, if you have made a gradual turn, the lever may not cancel automatically. In this event, return the lever to the neutral or off position by hand.

A turn signal indicator light located near the speedometer face flashes simultaneously with the exterior lights to inform you that your turn signals are operating.

BACK-UP LIGHTS

Bright, wide-beam back-up lights are available. These lights will automatically illuminate the area in back of your car whenever the ignition is in other than the "OFF" position and the transmission is in reverse.
