

FUSE LOCATION AND IDENTIFICATION

FUSE REPLACEMENT

For convenience, most of the replaceable fuses for your car's electrical system are located on a fuse-block fastened to the cowl panel under the left end of the instrument panel.

CIRCUIT BREAKERS

Selected circuits, such as headlights, are protected with circuit breakers. A circuit breaker is designed to stop current flow in case of a short-circuit or overload. It will automatically restore current flow after a few seconds, but will again interrupt current if the overload or short-circuit continues. This on-off cycle will continue as long as the overload or short-circuit exists.

Your Ford dealer or service station attendant can help you if you should have electrical trouble requiring fuse replacement or electrical circuit repairs.
