

MAINTENANCE OF YOUR FORD

In the second place, very little replacement lubricant is needed, even at 30,000 miles, and to protect your car, special plugs are installed instead of regular pressure fittings. These fit the latest pressure lubricator used by your Ford dealer for proper lubrication of your car. When you take your car elsewhere for more frequent greasing the old fashioned high pressure grease gun will scatter or blow down out the protective seals, leaving the joints wide open to dirt, dust, grit and other outside contaminants.

Of equal importance is the Ford research into motor oils and oil filters, which led to the 6,000-mile interval for the changing of each. You will notice that this schedule provides a convenient twice-a-year maintenance program (6,000 miles or six months, whichever comes first) which relieves you of the drudgery of frequent servicing visits.

Proper lubricants are also important in other areas such as the engine transmission, rear axle, etc. It is never an advantage to use that your car serviced with the lubricants specified ranges 37 and 38.

For example, when it is necessary to add transmission fluid to maintain proper level, use only *Hydramatic Automatic Trans-*

mission Fluid or Fluids which carry the following markings on the can: "Ford Qualification Number 17-A X X X X, 50000-01."

If you follow the maintenance program as detailed in this manual you won't have to keep a hard hat of do's and don't's, but there is one important item to keep in mind: Be sure that your engine oil level is checked regularly during the 6,000 miles or six months between oil changes. A simple way to schedule this is to request an oil check at each fuel stop.

It is normal to add some oil between changes, and the amount added will vary according to the severity of driving conditions, but it would not be excessive to add one quart each 1,000 miles. When adding oil it is important that you use only motor oils which clearly state on the container that they meet or exceed all car manufacturers' requirements for most severe (MSB) service.
