

WARNING: When a trailer and tow vehicle are towed on a highway, the tow vehicle must be driven at a speed of 30 mph or less. The tow vehicle must be driven at a speed of 30 mph or less.

Shifting: Shift to 2nd gear when the car is towed at a speed of 30 mph or less. Shift to 1st gear when the car is towed at a speed of 15 mph or less. Shift to 3rd gear when the car is towed at a speed of 30 mph or less.

Towing

Normally your Buick may be towed with all four wheels on the ground at speeds up to 30 mph or speeds of less than 30 mph. The driver should be off and the transmission in neutral.

However, the drive wheels (rear wheels) must be towed with the ground in the drive shaft disconnected when the transmission is not operating properly or when a speed of 30 mph or distance of 50 miles will be exceeded.

CAUTION: If car is towed on its four wheels only, the steering wheel must be turned with the wheels in a straight ahead position.

TRAILER HAULING

Passenger cars are designed and intended to be used primarily as passenger conveyances. A trailer cannot be towed behind a passenger car without having some effect on vehicle operation, durability and economy. Maximum satisfaction and pleasure will be derived through use of proper equipment and avoiding overloads and other abusive practices.

No special equipment is required, other than an appropriate hitch, for Buick cars to handle a trailer with gross weight less than 2,000 pounds in an adequate manner under normal occasional use, although the following recommendations outlined in this Manual should be followed. Buick makes light duty trailer hitches available through Buick Dealer Parts and Accessories Departments. For hauling trailers heavier than

2,000 pounds, it is recommended that an appropriately rated tow vehicle be used. Buick cars should not be towed with a tow vehicle. Tow vehicle must be driven at a speed of 30 mph or less. The tow vehicle must be driven at a speed of 30 mph or less.

MANUAL TRANSMISSION - 3-SPEED & 4-SPEED

The three and four speed transmissions are shifted through the forward "H" pattern as shown in the illustrations. Before shifting into any gear, depress the clutch pedal and then shift into the desired gear. In first and second gears, release the clutch pedal slowly while simultaneously depressing the accelerator pedal. In neutral, third and fourth gears, release the clutch a little faster. This reduces the wear on the flywheel and provides smoother operation.

Do's And Don'ts

- Don't use second, third or fourth gear to accelerate from a stop.
- Don't rest left on clutch pedal while driving.
- Don't coast in neutral.
- Do shift gears at moderate rate to allow time for transmission synchronizers to coordinate. "Speed Shifting" is harmful to transmission parts.
- Do shut off engine and apply parking brake before leaving car.
- Do start car only in neutral.
- Do use second gear (third gear with 4-speed transmission) at slow speeds, less than 30 MPH when driving in "stop and go" traffic, for improved vehicle performance during acceleration and when descending steep hills.
