Chang,2018-09-17 This book doesn t endorse any systematic theology rather it s about how we theologize Why do two equally trained theologians studying the same book and loving the same Lord arrive at such different conclusions This theological disagreement at times becoming personal spills over from the academia to seminaries and churches And if history is any indicator this always weakens the unity of the church Who needs unity when correct doctrines are at stake right But is the defense of all doctrines worth foregoing the unity of the church despite Jesus prayer that they may be one even as we are one At bottom our theological contentiousness stems from not recognizing that the way biblical revelation is framed is not designed to be handled the way seminaries typically do Regardless we strive for the rightness of our tidy theology even disowning those who disagree while doing so The disavowal of continuationists by the Strange Fire crowd is the most recent instance in a long line of placing doctrinal purity over the unity of the body This book

uncovers how Scripture is really structured and how therefore we need to theologize differently so that we may grow spiritually in Word and Spirit

**Patent Wars** Thomas F. Cotter, 2018-06-01 Patents are ubiquitous in contemporary life. Practically everything we use incorporates one or more patented inventions and recent years have witnessed epic disputes over such matters as the patenting of human genes, the control of smartphone design and technology, the marketing of patented drugs, and the conduct of patent trolls accused of generating revenue from nuisance litigation. But what exactly is a patent? Why do governments grant them? Can patents simultaneously encourage new invention while limiting monopoly and other abuses? In *Patent Wars*, Thomas Cotter, one of America's leading patent law scholars, offers an accessible, lively, and up-to-date examination of the current state of patent law, showing how patents affect everything from the food we eat to the cars we drive to the devices that entertain and inform us. Beginning with a general overview of patent law and litigation, the book addresses such issues as the patentability of genes, medical procedures, software, and business methods; the impact of drug patents and international treaties on the price of health care; trolls and the smartphone wars. Taking into account both the benefits and costs that patents impose on society, Cotter highlights the key issues in current debates and explores what still remains unknown about the effect of patents on innovation. An essential one-volume analysis of the topic, *Patent Wars* explains why patent laws exist in the first place and how we can make the system better.

**Ground Characterization and Structural Analyses for Tunnel Design** Benjamín Celada, Z.T. Bieniawski, 2019-08-06 This practical and design-oriented book focuses on ground characterization and structural calculation as part of the active structural design methodology. With a focus on rock tunnelling, it offers a comprehensive rather than a topic-based perspective, deriving sound tunnel design criteria and methods from basic principles. Ground characterization includes excavations, site investigation, and in situ stress determination, culminating in geotechnical classifications. The book then deals with various construction methods and their appropriate calculations, which range from constitutive models for the stress-strain behaviour of an excavation and tunnel support elements to a full stress-strain analysis methodology. The heavily practical approach of the book draws on the authors' twenty years of tunnelling experience in Spain and South America. It will help any young or established professional who wants to develop a career in the underground field across both civil engineering and geology. As it incorporates the very fundamentals of tunneling design, it can be used as a support for tunneling courses or as a textbook for master's and PhD courses. Benjamín Celada was Chief Tunnel Engineer at Hunosa and Potasas de Navarra S.A. before founding Geocontrol S.A. He has also worked for twenty years as Professor of Underground Works at the Polytechnic Mining University in Madrid, Spain. Z.T. Bieniawski directed the Rock Mechanics Department of the Council for Scientific and Industrial Research in Pretoria, then taught at the Pennsylvania State University for twenty years.
