

## LOCK CYLINDER CODING

### FIVE BITTING LEVEL LOCK CYLINDER AND KEY

All 1969 style cars are equipped with new lock cylinders and keys. The keyway has been revised so that prior model keys will not enter current model lock cylinders.

Two non-interchangeable keyways are used on 1969 model cars. One keyway, known as type "E", is used in all ignition, front door and station wagon tail gate lock cylinders. Type "E" keys will have a square head and be marked similar to keys used for 1968 styles, except that a capital letter "E" will be located on the shank just below the coining on the head, in place of capital letter "C". In addition, a code number within the series 0J00 to 9J99, or 0K00 to 9K99 will be stamped on the knock-out portion on the keyhead. This number identifies the lock combination and is used when ordering or making new keys.

The second keyway, known as type "H", is used in the instrument panel compartment, console compartment, rear compartment, front compartment

and station wagon rear floor compartment lock cylinders. Type "H" keys will have oval heads and will be similar to keys used for 1968 styles, except that a capital letter "H" will be stamped on the shank just below the coining on the head, in place of capital letter "D". In addition, a code number within the series 0L00 to 9L99, or 0M00 to 9M99 will be stamped on the knock-out portion of the key head. This number identifies the lock combination and is used when ordering or making new keys.

Key code numbers are stamped on the "knockout" plug in the key head and on the lock cylinder housing (to facilitate replacement or duplication of key). After the code number has been recorded by the owner, the plugs should be knocked out of the key head. From these numbers, the lock combination can be determined by use of a code list (available to owners of key cutting equipment from equipment suppliers). If key code numbers are not available from records or from the "knock-out" plug, lock combination (tumbler numbers and position arrangement) can be determined by laying the key on the diagram in Figure 1-4.
