

## 3-2 MAINTENANCE

from which an item is viewed is of no consequence, because starboard and port **NEVER** change no matter where the individual is located.

### 3-2 OUTBOARD SERIAL NUMBERS

The engine serial numbers are the manufacturer's key to engine changes. These numbers identify the year of manufacture, the qualified horsepower rating, and the parts book identification. If any correspondence or parts are required, the engine serial number **MUST** be used or proper identification is not possible. The accompanying illustration will be very helpful in locating the engine identification tag for the various models.

#### ONE MORE WORD:

The serial number establishes the year in which the engine was produced and not necessarily the year of first installation.

Two serial number locations are used on each of the outboard units covered in this manual. The most accessible location is on the serial/instruction plate on the serial bracket. The other location is on the engine cylinder block.

### 3-3 LUBRICATION - COMPLETE UNIT

As with every type mechanical invention with moving parts, lubrication plays a prominent role in operation, enjoyment, and longevity of the unit.

If an outboard unit is operated in salt water the frequency of applying lubricant to

fittings is usually cut in half for the same fitting if the unit is used in fresh water. The few minutes involved in moving around the outboard applying lubricant and at the same time making a visual inspection of its general condition will pay in rich rewards with years of continued service.

It is not uncommon to see outboard units well over 20-years of age moving a boat through the water as if the unit had recently been purchased from the current line of models. An inquiry with the proud owner will undoubtedly reveal his main credit for its performance to be regular periodic maintenance.

The following chart can be used as a guide to periodic maintenance while the outboard is being used during the season. The pictures numbers reference in the chart are keyed to the illustrations in this section.

In addition to the normal lubrication listed in the lubrication chart, the prudent owner will inspect and make checks on a regular basis as listed in the accompanying chart.

Serial numbers on the identification plate of a late model outboard unit covered in this manual. This is a standard location for the plate although some units may have it elsewhere.

The electrical system should be checked at the beginning of each season. Check all connections to be sure they are clean, secure, and free of corrosion. Inspect the wiring for any type of damage.
