2015 Us Affair Almanac:

The American Almanac, Year-book, Cyclopedia and Atlas, 1902 *Asian and Pacific Islander Americans in Congress, 1900-2017* Albin Kowalewski, 2017 **The Middle East, Oil, and the U.S. National Security Policy** Donald M. Snow, 2016-03-17 Three interrelated subject areas are at the heart of the current foreign and national security dilemma One is the Middle East which has been the epicenter of most U S policy activity for over a third of a century The second is energy policy particularly as it is affected by the development and exploitation of shale oil and gas reserves in the United States This is linked to the Middle East because it has been American dependence on Middle East petroleum that has created the interest the U S has in this region The third area is military manpower policy and two simultaneous wars in the new century have raised questions about the all volunteer force policy in place since 1972 It is increasingly evident that foreign and defense policy are strained and in need of fresh conceptualization The three areas identified are the most obvious examples of policy dysfunction The key area is the Middle East region As long as the United States remains heavily committed to this part of the world especially with military force and essentially because of its energy needs there will be strains on manpower resources that could force a reexamination of the all volunteer concept At the same time the reduction of U S dependence on Middle Eastern oil loosens the bonds that seem to impel American activism in the region The result could be true opportunities for a less confrontational adversary driven foreign and defense posture **Defense Innovation Handbook** Adedeji B. Badiru, Cassie Barlow, 2018-09-03 Innovation is the lifeline of national development This handbook is a collection of chapters that provide techniques and methodologies for achieving the transfer of defense targeted science and technology development for general industrial applications The handbook shows how to translate theory and ideas into practical applications Experts from national defense institutions government laboratories business and industry contributed chapters to this handbook The handbook also serves as an archival guide for nations communities and businesses expecting to embark upon science and technology transfer to industry Included are several domestic and international case examples of practical innovation Since the dawn of history nations have engrossed themselves in developing new tools techniques and methodologies to protect their geographical boundaries From the crude implements used by prehistorical people to very modern technologies the end game has been the same That is to protect the homeland Even in times of peace efforts must be made to develop new machinery equipment processes and devices targeted for the protection of the nation The emergence of organized nations and structured communities facilitated even more innovative techniques of national defense Evolution revolution and innovation have defined human existence for millennia From the Ice Age to the Stone Age the Bronze Age the Iron Age and to the modern age innovation rudimentary as it may be in many cases has determined how humans move from one stage to the next This comprehensive handbook provides a clear guide on the nuances of initiating and actualizing innovation Both the qualitative and quantitative aspects of innovation are covered in the handbook Features Uses a systems
