# 2015 Vcu Holiday Schedule

**John T. Kneebone, Eugene P. Trani**

## **2015 Vcu Holiday Schedule:**

**Fulfilling the Promise** John T. Kneebone, Eugene P. Trani, 2020-09-22 Founded in Richmond in 1968 Virginia Commonwealth University VCU began with a mission to build a university to serve a city emerging from the era of urban crisis desegregation white flight political conflict and economic decline With the merger of the Medical College of Virginia and the Richmond Professional Institute into the single state mandated institution of VCU the two entities were able to embrace their mission and work together productively In *Fulfilling the Promise* John Kneebone and Eugene Trani tell the intriguing story of VCU and the context in which the university was forged and eventually thrived Although VCU's history is necessarily unique Kneebone and Trani show how the issues shaping it are common to many urban institutions from engaging with two party politics in Virginia and African American political leadership in Richmond to fraught neighborhood relations the complexities of providing public health care at an academic health center and an increasingly diverse student body As a result *Fulfilling the Promise* offers far more than a stale institutional saga Rather this definitive history of one urban setting state university illuminates the past and future of American public higher education in the post 1960s era

**Death and Rebirth in a Southern City** Ryan K. Smith, 2020-11-17 This exploration of Richmond's burial landscape over the past 300 years reveals in illuminating detail how racism and the color line have consistently shaped death burial and remembrance in this storied Southern capital Richmond Virginia the former capital of the Confederacy holds one of the most dramatic landscapes of death in the nation Its burial grounds show the sweep of Southern history on an epic scale from the earliest English encounters with the Powhatan at the falls of the James River through slavery the Civil War and the long reckoning that followed And while the region's deathways and burial practices have developed in surprising directions over these centuries one element has remained stubbornly the same the color line But something different is happening now The latest phase of this history points to a quiet revolution taking place in Virginia and beyond Where white leaders long bolstered their heritage and authority with a disregard for the graves of the disenfranchised today activist groups have stepped forward to reorganize and reclaim the commemorative landscape for the remains of people of color and religious minorities In *Death and Rebirth in a Southern City* Ryan K Smith explores more than a dozen of Richmond's most historically and culturally significant cemeteries He traces the disparities between those grounds which have been well maintained preserving the legacies of privileged whites and those that have been worn away dug up and built over erasing the memories of African Americans and indigenous tribes Drawing on extensive oral histories and archival research Smith unearths the heritage of these marginalized communities and explains what the city must do to conserve these gravesites and bring racial equity to these arenas for public memory He also shows how the ongoing recovery efforts point to a redefinition of Confederate memory and the possibility of a rebirthed community in the symbolic center of the South The book encompasses among others St John's colonial churchyard African burial grounds in Shockoe Bottom and on Shockoe Hill Hebrew Cemetery

Hollywood Cemetery with its 18 000 Confederate dead Richmond National Cemetery and Evergreen Cemetery home to tens of thousands of black burials from the Jim Crow era Smith's rich analysis of the surviving grounds documents many of these sites for the first time and is enhanced by an accompanying website [www.richmondcemeteries.org](http://www.richmondcemeteries.org) A brilliant example of public history *Death and Rebirth in a Southern City* reveals how cemeteries can frame changes in politics and society across time

The Physical University Paul Temple, 2014-03-21 The great universities of the world are to a large extent defined in the public imagination by their physical form when people think of a university they usually think of a distinctive place rather than about say the teaching or the research that might go on there This is understandable both because universities usually stay rooted to the same spot over the centuries and because their physical forms may send powerful messages about the kind of places they are The physical form of the university and how the spaces within it become transformed by their users into places which hold meanings for them has become of increased interest recently from both academic and institutional management perspectives when trying to understand more about how universities work and how they may be made more effective Yet despite its seemingly obvious importance the available literature on space and place in higher education internationally is scant when compared to that dealing with say teaching and learning methods or with evaluating quality or many other topics This book brings together a range of academic and professional perspectives on university spaces and places and show how technical matters of building design maintenance and use interact with academic considerations on the goals of the university Space issues are located at an intellectual crossroads where widely differing conceptual and professional perspectives meet and need to be integrated and this important book brings together perspectives from around the world to show design and use issues are changing Higher Education Globally higher education is being required to do more things to teach more students to be better at research to engage more with business and communities and many other things These pressures are leading universities to reconsider their management processes as well as their academic structures an often quoted saying is that we make our buildings and afterwards they make us At a time when universities and colleges are seeking competitive advantages ideas and analysis about space design and use is much needed and will be well received

**Palliative Care in Critical Care, An Issue of Critical Care Nursing Clinics of North America** Tonja Hartjes,2016-07-22 Intensive care units ICUs provide comprehensive advanced care to patients with serious or life threatening conditions and consequently a significant amount of end of life care EOLC Indeed approximately 20% of deaths in the U S are associated with an ICU stay and nearly half of U S patients who die in hospitals experience an ICU stay during the last 3 days of life Despite the commonality of the ICU experience ICU patients typically suffer from a range of distressing symptoms such as pain fatigue anxiety and dyspnea causing families significant distress on their behalf Thus there is a growing imperative for better provision of palliative care PC in the ICU which may prevent and relieve suffering for patients with life threatening illnesses Effective palliative care is accomplished through aggressive symptom management communication about the patient and family s physical psychosocial and spiritual concerns and aligning treatments with each patient s goals values and preferences PC is also patient centered and uses a multidisciplinary team based approach that can be provided in conjunction with other life sustaining treatments or as a primary treatment approach Failure to align treatment goals with individual and family preferences can create distress for patients families and providers If implemented appropriately palliative care may significantly reduce the health care costs associated with intensive hospital care and help patients avoid the common non person centered treatment that is wasteful distressing and potentially harmful Due to the success of many PC programs administrators providers and accrediting bodies are beginning to understand that palliative care in the ICU is vital to optimal patient outcomes

The Struggle for Change Marvin T. Chiles,2023-12-28 A Black majority city with a history of the most severe segregation and inequity Richmond is still grappling with this legacy as it moves into the twenty first century Marvin Chiles now offers a unique take on Richmond s racial politics since the civil rights era by demonstrating

that the city's current racial disparities in economic mobility housing and public education actually represent the unintended consequences of Richmond's racial reconciliation measures He deftly weaves municipal politics together with grassroots efforts examining the work and legacies of Richmond's Black leaders from Henry Marsh on the city council in the 1960s to Mayor Levar Stoney to highlight the urban revitalization and public history efforts meant to overcome racial divides after Jim Crow yet which ironically reinforced racial inequality across the city Compellingly written this project carries both local and broader regional significance for Richmonders Virginians southerners and all Americans Counting Bounty Jeffery Johnson Smith, 2020-10-02 How much do we spend on the nature we use Answer that and you'll know the size of your commonwealth and the coming phase of the economy Most economists bundle land with capital or leave out land and its rent altogether and cripple their discipline Geonomists OTOH forecast the last recession to the exact quarter Counting Bounty highlights a widespread blindspot Most of us overlook land and its power to twist an economy Householders typically spend most of their budget on land beneath their homes and within every purchase like food without awareness Tallying rent this work fills in those blindspots with insights society needs to know It's not possible to do economics without getting politics all over you The story begins with the official and academic efforts to minimize the total worth of Earth in America A perusal of the historical relationship between the elite and the intellectual shows that paying the piper calling the tune is the norm even up to the present Using a slew of statistics and others research findings I track rent to its recipients to the rentiers who own much and wield much power The cited sources give the story more legs to stand on than a centipede Aware reformers can address pressing problems by tapping land value Towns in Pennsylvania infill instead of sprawl efficient land use conserves energy Pittsburgh spurs urban renewal sans subsidy cities are cash starved Once towns in Australia experienced factory openings during a recession Aspen Colorado and Hong Kong build affordable housing narrowing inequality Alaska and Singapore pay residents a dividend freeing some to drop out of the rat race Watching rent flow sheds light on how economies operate why they sometimes fail and what a society can do about it As critical issues reach a tipping point the problems that misdirecting rent causes redirecting rent can solve Drawing attention to the grand total for rent by itself raises the possibility of redirecting Public Policy Sara R. *Academic Libraries and Public Engagement With Science and Technology* Eileen Harrington, 2019-03-22 Libraries have historically played a role as a community builder providing resources and spaces where knowledge can be archived shared and created They can also play a pivotal role in fostering the public s understanding of science and scientific processes From makerspaces to data visualization labs to exhibits many libraries already delve into scientific explorations and many more could join them Scientists often need to include broader impacts goals in grant proposals but they might not know where to begin or feel that they do not have the time to devote to public engagement This is where libraries and librarians can help Research in science communication also supports tapping into libraries for public engagement with science Studies show that it is important for scientists to present findings in an apolitical way not aligning with one solution or one way of thinking and not being seen as an activist Druckman 2015 Jamieson Hardy 2014 One of the core tenets of librarians and libraries is to present information in a neutral way Research also shows that Informal conversations about science can have a greater effect on people than reading about it online or hearing about it on the news Eveland Cooper 2013 Again libraries can play a role in fostering these types of conversations Given this landscape this book will demonstrate concrete ways that libraries and librarians can play a role in fostering public engagement with science In addition to background information on the current landscape of public knowledge and understanding of science it will also include best practices and case studies of

different types of programming and services that libraries can offer Often libraries do not jump to mind when people think about science education or science literacy and many librarians do not come from a science background Literature on science programming and sharing science is largely absent from the library field This book will help give confidence to librarians that they can participate in engaging the public with science At the same time it will provide a conduit to bring informal science educators communication officers from universities or research organizations who share scientific discoveries with the public and librarians together to explore ways to align their work to promote scientific literacy for all Demonstrates concrete ways that libraries and librarians can play a role in fostering public engagement with science Features best practices and case studies of different types of programming and services that libraries can offer Provides a conduit to bring informal science educators communication officers and librarians together to explore ways to align their work to promote scientific literacy
