The Imperial Mode of Living Ulrich Brand, Markus Wissen, 2021-01-26 Our Unsustainable Life Why We Can t Have Everything We Want With the concept of the Imperial Mode of Living Brand and Wissen highlight the fact that capitalism implies uneven development as well as a constant and accelerating universalisation of a Western mode of production and living The logic of liberal markets since the 19th Century and especially since World War II has been inscribed into everyday practices that are usually unconsciously reproduced The authors show that they are a main driver of the ecological crisis and economic and political instability The Imperial Mode of Living implies that people s everyday practices including individual and societal orientations as well as identities rely heavily on the unlimited appropriation of resources a disproportionate claim on global and local ecosystems and sinks and cheap labour from elsewhere This availability of commodities is largely organised through the world market backed by military force and or the

asymmetric relations of forces as they have been inscribed in international institutions Moreover the Imperial Mode of Living implies asymmetrical social relations along class gender and race within the respective countries Here too it is driven by the capitalist accumulation imperative growth oriented state policies and status consumption The concrete production conditions of commodities are rendered invisible in the places where the commodities are consumed The imperialist world order is normalized through the mode of production and living Learning Rates of Electric Vehicles Andreas Zerfaß,2017-07-25

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide CO₂ and air pollutant emissions However battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles Despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of BEVs and PHEVs in the short to mid term Here the author seeks to obtain insight into the techno economic prospects of BEVs and PHEVs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis The analysis captures the situation in Germany between 2010 and 2016 Cleaning Up Greenwash Angus Nurse,2022-02-25 A 2022 Choice Reviews Outstanding Academic Title Through a green criminological perspective Angus Nurse examines the contemporary reality of corporate environmental crime and illegal activities that have become normalized within many major corporations Arguably this is an inevitable consequence of a corporate culture that prioritizes profits and the smooth operation of market activities over environmental concerns coupled with the increased political power of major corporations that can act almost with impunity and where problems do occur can literally buy itself out of trouble These same corporations are broadly perceived as being responsible actors However Nurse argues that corporate environmental offending is often deliberate and that corporations understand that they will often be allowed to continue with polluting and non compliant behavior because the likely enforcement responses are fines and settlements rather than criminal prosecution Using several case studies Nurse explores biopiracy and the rights of indigenous peoples the behavior of oil companies in African states the regulation of corporate social responsibility and corporate environmental responsibility an analysis of contemporary environmental legislation and the prosecution of environmental harm and state corporate crime and air pollution Dealing with these problems requires a wider notion of crime and wrongdoing that directly engages with the types of environmental offending that represent a threat to human populations and non human nature irrespective of whether these are defined as crime by justice systems

The Green Transition of the Automotive Industry Anna Cabigiosu,Pietro Lanzini,2023-11-10 This edited collection offers deeper understanding of the green and digital transition in the automotive industry It explains how mobility products services and business models are changing the opportunities and threats correlated to this double transition as well as the

competences and resources needed for firms in this fluid scenario The book firstly provides an in depth overview of the strategic and managerial implications for automotive and mobility incumbent firms Chapters describe how sustainable technologies have been changing over time and identify the challenges of the shift imposed by the new competitive environment such as the so called servitization of the industry The second section describes the new drivers of growth and profitability such as open and collaborative innovation and provides guidance on how incumbents can surf this turbulent landscape
