Marsh,2012-02-01 Drawing on three years of field research and extensive theoretical and empirical literature *Democratic Dilemmas* chronicles the day to day efforts of educators and laypersons working together to advance student learning in two California school districts Julie A Marsh reveals how power values organizational climates and trust played key roles in these two districts achieving vastly different results In one district parents citizens teachers and administrators effectively developed and implemented districtwide improvement strategies in the other community and district leaders unsuccessfully attempted to improve systemwide accountability through dialogue The book highlights the inherent tensions of deliberative democracy competing notions of representation limitations of current conceptions of educational accountability and the foundational importance of trust to democracy and education reform It further provides a framework for improving community educator collaboration and lessons for policy and practice

allocate quite different amounts to the states In addition while shortcomings were noted in the data provided by the states the ACS estimates were shown to fluctuate between years causing concern among the states about the unpredictability and unevenness of program funding In this context the U S Department of Education commissioned the National Research Council to address the accuracy of the estimates from the two data sources and the factors that influence the estimates The resulting book also considers means of increasing the accuracy of the data sources or alternative data sources that could be used for allocation purposes
