English as an Additional Language (EAL) Contexts** Angel M.Y. Lin, 2016-09-15 This book will be of interest to a broad  
readership regardless of whether they have a background in sociolinguistics functional linguistics or genre theories It  
presents an accessible meta language i e a language for talking about language that is workable and usable for teachers and  
researchers from both language and content backgrounds thus facilitating collaboration across content and language subject  
panels Chapters 1 to 3 lay the theoretical foundation of this common meta language by critically reviewing systematically  
presenting and integrating key theoretical resources for teachers and researchers in this field In turn Chapters 4 to 7 focus  
on issues in pedagogy and assessment and on school based approaches to LAC and CLIL drawing on both research studies  
and the experiences of front line teachers and school administrators Chapter 8 provides a critical and reflexive angle on the  
field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of  
access to the linguistic and cultural capitals where the local languages of the students are usually neglected or viewed  
unfavourably in relation to the L2 in mainstream society and where teachers are usually positioned as recipients of  
knowledge rather than makers of knowledge In closing Chapter 9 reviews the state of the art in the field and proposes  
directions for future inquiry □ **Integral Methods in Science and Engineering** Christian Constanda, 1994-12-12 Integral
