Name _____

- ✓ The final exam will be all multiple-choice. Come prepared with a pencil.
- ✓ Do not bring electronic devices to the exam (other than a calculator). This includes cell phones and mp3 players. If I see them I will take them.
- ✓ There will be no rest room passes until you are done with the test.
- ✓ I will provide a formula sheet (identical to one attached to this study guide) and a laminated periodic table.
- ✓ This study guide will be extra credit toward your final exam grade.
- ✓ **BRING A PENCIL AND A CALCULATOR!!!** Don't come to my final without these.
- ✓ The Chemistry Final Exam will count for 15% of your final semester grade. The exam will cover material from second semester. Some questions will require you to know material from first semester. Complete this review sheet on a separate sheet of paper. This review sheet covers all of the questions you will answer on the final exam, but be prepared to apply the knowledge on this study guide to other questions.

"Success is a state of mind. If you want success, start thinking of yourself as a success."

- ✓ Keys to success:
 - Complete this study guide.
 - Don't wait until Monday or Tuesday before finals to get help.
 - Start studying early. Remember, you have all summer to relax.
 - Be prepared.

Final exam topics:

1. Chemical Reactions + Balancing
2. The Mole + Stoichiometry
3. Aqueous solutions and Solubility
4. The Behavior of Gases
5. Acids and Bases

God's Perfect Plan Mark Paul Bishop, 2011-06 While working in the ER one evening the nurse called to tell me that Pastor Steve would like to talk with me As I shared my thoughts with Pastor Steve the simplicity of his responses almost left me speechless It was from this life changing conversation that Dr Mark Paul Bishop began a life devoted to Christ exhausting his human potential in service to his fellow man God's Perfect Plan is Dr Mark's spiritual autobiography and details his faith journey as he wrestles with issues directly pointing to the deficiency of our lives a deficiency that he learned can only be filled through a relationship with Christ Readers will be inspired as they seek their own answers to questions regarding God's perfect plan in their own lives Woven into the fabric of God's perfect plan for you you will discover the role of our social institutions of the family church school community and government You will be further amazed by the manner in which God incubates His plan for your life through His divine guidance and protection See how this family physician despite skepticism and wavering faith demonstrates how God's purpose and plan is clear in our lives if we only look for it The practical application of Christianity is not a myth it really does work See for yourself as you discover God's perfect plan

Learning Science Through Computer Games and Simulations National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Science Learning: Computer Games, Simulations, and Education, 2011-05-12 At a time

when scientific and technological competence is vital to the nation's future the weak performance of U.S. students in science reflects the uneven quality of current science education. Although young children come to school with innate curiosity and intuitive ideas about the world around them, science classes rarely tap this potential. Many experts have called for a new approach to science education based on recent and ongoing research on teaching and learning. In this approach, simulations and games could play a significant role by addressing many goals and mechanisms for learning science: the motivation to learn science, conceptual understanding, science process skills, understanding of the nature of science, scientific discourse and argumentation, and identification with science and science learning. To explore this potential, *Learning Science: Computer Games, Simulations, and Education* reviews the available research on learning science through interaction with digital simulations and games. It considers the potential of digital games and simulations to contribute to learning science in schools, in informal/out-of-school settings, and in everyday life. The book also identifies the areas in which more research and research-based development is needed to fully capitalize on this potential. *Learning Science* will guide academic researchers, developers, publishers, and entrepreneurs from the digital simulation and gaming community, and education practitioners and policy makers toward the formation of research and development partnerships that will facilitate rich intellectual collaboration. Industry, government agencies, and foundations will play a significant role through start-up and ongoing support to ensure that digital games and simulations will not only excite and entertain but also motivate and educate.

Who's the New Kid in Chemistry? John D. Butler, 2013-12-12 *Who's the New Kid in Chemistry* offers an unprecedented look at student engagement and teacher best practices through the eyes of an educational researcher enrolled as a public high school student. Over the course of seventy-nine consecutive days, John D. Butler participates in and observes Rhode Island 2013 Teacher of the Year Jessica M. Waters's high school chemistry class, documenting his experiences as they unfold. *Who's the New Kid in Chemistry* is a compelling example of what can be accomplished when an educational researcher and teacher collaborate in the classroom. This work includes a discussion on flexible homework assignments, data-driven instruction, and thirty teacher best practices. This book is an invaluable resource for teachers across all content areas, masters and doctoral research method classes, and future Teachers of the Year.
