

8. Remove the mounting bolts and the A/C compressor. Be careful not to damage the radiator fins when removing the A/C compressor.
9. Install the A/C compressor in the reverse order of removal, and note these items:
 - If you're installing a new A/C compressor, you must calculate the amount of refrigerant oil to be removed from it.
 - Replace the O-rings with new ones at each fitting, and apply a thin coat of refrigerant oil before installing them. Be sure to use the correct O-rings for HFC-134a (R-134a) to avoid leakage.
 - Use refrigerant oil (DENSO ND-OIL 8) for HFC-134a DENSO piston type A/C compressor only.
 - To avoid contamination, do not return the oil to the container once dispensed, and never mix it with other refrigerant oils.
 - Immediately after using the oil, reinstall the cap on the container, and seal it to avoid moisture absorption.
 - Do not spill the refrigerant oil on the vehicle; it may damage the paint; if the refrigerant oil contacts the paint, wash it off immediately.
 - Be careful not to damage the radiator fins when installing the A/C compressor or the A/C condenser fan shroud.
 - Charge the system.
 - Do the PCM idle learn procedure.
 - Reset the power window control unit.
 - Enter the anti-theft codes for the radio, and the navigation system then enter the customer's radio station presets.
