The Shock of the News Brian A. Monahan, 2010-03-29 How did the events of September 11, 2001 come to be thought of as 9/11? *The Shock of the News* is an authoritative account of post-9/11 political and social processes, offering an in-depth analysis of the media coverage of this momentous event. Brian Monahan demonstrates how 9/11 has been transformed into a morality tale centered on patriotism, victimization, and heroes. Introducing the idea of public drama as a way of making sense of how media processed and packaged the 9/11 attacks for their audiences, Monahan not only illuminates how and why the coverage took shape as it did but also provides us with new insights into the social, cultural, and political consequences of the attacks and their aftermath. Monahan explains how and why 9/11 became such a potent symbol, exploring how meanings and symbols get created, reinforced, and disseminated in modern society. Ultimately, Monahan offers an important new understanding of this singular event of our time, and his compelling narrative brings the momentous events back into focus.

Bonhoeffer's New Beginning Andrew D. DeCort, 2018-09-15 Bonhoeffer's *New Beginning* investigates the ethics of making new beginnings after devastating moral rupture. The work argues that new beginnings must be made in order to sustain the fundamental convictions that it is good to exist and that life in the world with others should be loved without exclusion. Bonhoeffer's ethics of new beginning is set in conversation with the thought of four moral philosophers: Friedrich Nietzsche, Hannah Arendt, Jonathan Glover, and Jonathan Lear. DeCort argues that Bonhoeffer's ethics of new beginning opens and energizes a more promising world, affirming moral vision with radical hope for new beginnings.

Perceptual Linguistic Salience: Modeling Causes and Consequences Alice Blumenthal-Dramé, Adriana Hanulíková, Bernd Kortmann, 2017-06-05 Recent years have seen an upsurge of interest in the notion of salience in linguistics and related disciplines While in top down salience perceivers endogenously direct their attention to a certain stimulus in the bottom up salience it is the stimulus itself which attracts attention In prototypical cases of bottom up salience the stimulus stands out because it is incongruous with a given ground by virtue of intrinsic physical characteristics But a stimulus may also cause surprise by virtue of deviating from a cognitive ground e g when violating social or probabilistic expectations This has prompted researchers to examine the relationship between expectations and the perceptual salience of linguistic stimuli in new ways This e book features contributions from different scientific frameworks The reader will find commentaries reviews and original research articles on models of sociolinguistic and morphological salience the role of attention affect and predictability and on how salient items are processed categorized and learned Taken together the articles in this volume contribute to our understanding of how the perceptual salience of linguistic forms and variants can be theoretically framed and methodologically operationalized in different areas of linguistic processing
