**Spatiotemporal Analysis of Air Pollution and Its Application in Public Health** Lixin Li, Xiaolu Zhou, Weitian Tong, 2019-11-13 Spatiotemporal Analysis of Air Pollution and Its Application in Public Health reviews in detail the tools needed to understand the spatial-temporal distribution and trends of air pollution in the atmosphere, including how this information can be tied into the diverse amount of public health data available using accurate GIS techniques. By utilizing GIS to monitor, analyze, and visualize air pollution problems, it has proven to not only be the most powerful, accurate, and flexible way to understand the atmosphere but also a great way to understand the impact air pollution has in diverse populations. This book is essential reading for novices and experts in atmospheric science, geography, and any allied fields investigating air pollution. Introduces readers to the benefits and uses of geo-spatiotemporal analyses of big data to reveal new and greater understanding of the intersection of air pollution and health. Ties in machine learning to improve speed and efficacy of data models. Includes developing visualizations, historical data, and real-time air pollution in large geographic areas.

*UTAGS Administration Manual* M. Steve McCallum, Bruce Bracken, 2023-05-31 This is the technical manual for the Universal Talented and Gifted Screener (UTAGS). Universal Talented and Gifted Screener (UTAGS) features up-to-date national norms, is effective with twice exceptional learners, includes bias-free items, and provides a fair assessment regardless of student demographic characteristics. The UTAGS offers schools a time-saving screener for identifying gifted and advanced learners. Designed to be culturally and linguistically fair, the UTAGS is ideal for schools seeking a nationally normed, statistically sound identification screener. Additionally, the UTAGS includes specific considerations for identifying twice exceptional learners. UTAGS is designed to screen potentially gifted students in six important areas of school success: cognition, creativity, leadership, literacy, math, and science. This theoretically sound instrument provides easily interpretable scores in the IQ metric (i.e., Mean 100, SD 15) and identifies student strengths/weaknesses in a quick, accurate, and cost-efficient format. UTAGS provides interpretation norms based on a standardization sample of 2,492 participants from 22 states; student demographics closely reflect the United States population. The authors also provide a guide for local norming. Assessment fairness was a strong consideration during the UTAGS development, and teacher raters are requested to focus on effective examinee communication strategies rather than addressing the particular language communication mode employed by the student. Consequently, examinees from other cultures, those who have speech

limitations or those who use nonstandard English are not unfairly penalized Ages 5 years 0 months 17 years 11 months
