Partial Identification in Econometrics and Related Topics Nguyen Ngoc Thach, Nguyen Duc Trung, Doan Thanh Ha, Vladik Kreinovich, 2024-07-31 This book covers data processing techniques with economic and financial application being the unifying theme To make proper investments in economy the authors need to have a good understanding of the future trends how will demand change how will prices change etc In general in science the usual way to make predictions is to identify a model that best fits the current dynamics and to use this model to predict the future behavior In many practical situations especially in economics our past experiences are limited As a result the authors can only achieve a partial identification It is therefore important to be able to make predictions based on such partially identified models which is the main focus of this book This book emphasizes partial identification techniques but it also describes and uses other econometric techniques ranging from more traditional statistical techniques to more innovative ones such as game theoretic approach interval techniques and machine learning Applications range from general analysis of GDP growth stock market and consumer prices to analysis of specific sectors of economics credit and banking energy health labor tourism international trade to specific issues affecting economy such as ecology national culture government regulations and the existence of shadow economy This book shows what has been achieved but even more important are remaining open problems The authors hope that this book will inspire practitioners to learn how to apply state of the art techniques especially techniques of optimal transport statistics to economic and financial problems and inspire researchers to further improve the existing techniques and to come up with new techniques for studying economic and financial phenomena The authors want to thank all the authors for their contributions and all anonymous referees for their thorough analysis and helpful comments The publication of this book and organization of the conference at which these papers were presented was supported by the Ho Chi Minh University of Banking HUB Vietnam and by the Vingroup Innovation Foundation VINIF The authors thank the leadership and staff of HUB and VINIF for

providing crucial support **Bayesian Econometrics** Mauro Bernardi, Stefano Grassi, Francesco Ravazzolo, 2020-12-28

Since the advent of Markov chain Monte Carlo MCMC methods in the early 1990s Bayesian methods have been proposed for a large and growing number of applications One of the main advantages of Bayesian inference is the ability to deal with many different sources of uncertainty including data models parameters and parameter restriction uncertainties in a unified and coherent framework This book contributes to this literature by collecting a set of carefully evaluated contributions that are grouped amongst two topics in financial economics The first three papers refer to macro finance issues for real economy including the elasticity of factor substitution ES in the Cobb Douglas production function the effects of government public spending components and quantitative easing monetary policy and economics The last three contributions focus on cryptocurrency and stock market predictability All arguments are central ingredients in the current economic discussion and their importance has only been further emphasized by the COVID 19 crisis **Models in System Design** Jean-Michel Bergé, Oz Levina, Jacques Rouillard, 2012-12-06

Models in System Design tracks the general trend in electronics in terms of size complexity and difficulty of maintenance System design is by nature combined with prototyping mixed domain design and verification and it is no surprise that today's modeling and models are used in various levels of system design and verification In order to deal with constraints induced by volume and complexity new methods and techniques have been defined Models in System Design provides an overview of the latest modeling techniques for use by system designers The first part of the book considers system level design discussing such issues as abstraction performance and trade offs There is also a section on automating system design The second part of the book deals with some of the newest aspects of embedded system design These include co verification and prototyping Finally the book includes a section on the use of the MCSE methodology for hardware software co design Models in System Design will help designers and researchers to understand these latest techniques in system design and as such will be of interest to all involved in embedded system design *Open Source Software Policy Options for NASA Earth and Space Sciences* National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Best Practices for a Future Open Code Policy for NASA Space Science, 2019-01-27

Modern science is ever more driven by computations and simulations In particular the state of the art in space and Earth science often arises from complex simulations of climate space weather and astronomical phenomena At the same time scientific work requires data processing presentation and analysis through broadly available proprietary and community software 1 Implicitly or explicitly software is central to science Scientific discovery understanding validation and interpretation are all enhanced by access to the source code of the software used by scientists This report investigates and recommends options for NASA's Science Mission Directorate SMD as it considers how to establish a policy regarding open source software to complement its existing policy on open data In particular the report reviews existing data and software policies and the lessons learned from the implementation of those policies summarizes

community perspectives and presents policy options and recommendations for implementing an open source software policy for NASA SMD *Signal and Information Processing, Networking and Computers* Jiaqi Zou,Gang Sun,Yue Wang,Lexi Xu,2025-06-16 This proceedings book presents the latest research in the fields of signal and information processing schemes computer theory space technologies big data as well as other related technologies Collecting selected papers from the 12th Conference on Signal and Information Processing Networking and Computers ICSINC is held in Chongqing China on September 10 13 2024 it is of interest to professionals from academia and industry alike *Reproducibility and Rigour in Computational Neuroscience* Sharon Crook,Andrew P.
